IOWA'S LEADING FARM NEWSPAPER DECEMBER 17, 1955

Too much fat on beef? 7

Will "efficiency" help you? . . 10

Short on subsoil moisture. . . . 15

Winners at International 18

". . . Ye shall find a babe wrapped in swaddling clothes and lying in a manger."

Luke, 2:12

NEW faces may dramatize the Christmas Story. But its message of love and hope has been unexcelled thru almost 2,000 years.

Our cover portrays a rural school's version of the Holy Child's reception. Photo was made in Hamilton county, Iowa. See more rural school Christmas program pictures on page 20.

Cut farm hauling costs to the bone with today's most modern trucks!

MOST MODERN in appearance, most modern in feature after top-quality feature! That's why you maintain peak efficiency with new Chevrolet Task-Force trucks—and keep hauling costs at a rock-bottom low. When efficiency's up . . . upkeep's down!

Most modern in power, with the shortest stroke V8's in any leading truck and the greatest engine choice in Chevrolet truck history! Whether you go V8 or 6—count on high-compression valve-in-head economy . . . and faster starting with Chevrolet's big 12-volt electrical system.

Most modern all the way through, with Powermatic design! Frames are more rigid and rugged. Cabs are more comfortable, more durably constructed. As for extras—tubeless tires are standard on ½-ton models; Power Brakes on 2-ton jobs. Your Chevrolet dealer will be glad to supply details about Hydra-Matic, Overdrive, Power Steering and other cost-cutting, labor-saving features. He'll show you, too, why you'll be way ahead at trade-in time tomorrow with today's most modern truck. . . . Chevrolet Division of General Motors, Detroit 2, Michigan.

NEW CHEVROLET *Task·Force* TRUCKS

CHEVROLET

WALLACES' FARMER AND IOWA HOMESTEAD. December 17, 1955 (Vol. 80, No. 24). Published first and third Saturdays of each month by the James M. Pierce Corporation, Des Moines, Iowa. Subscription price, one year for one dollar. Entered as second-class matter October 19, 1929, at the post office in Des Moines, Iowa, under the act of March 3, 1879. Copyright, 1955, by the James M. Pierce Corporation.

your money comes back 4 ways when you buy an MM SHELLER

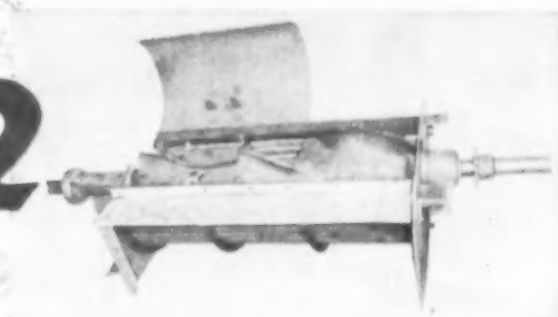
Team the MM Model D Sheller to this MM ZB tractor and you've got big shelling capacity with a hefty 3-plow power reserve.

All-time Best-Sellers in their size!

1

You cut per-bushel costs

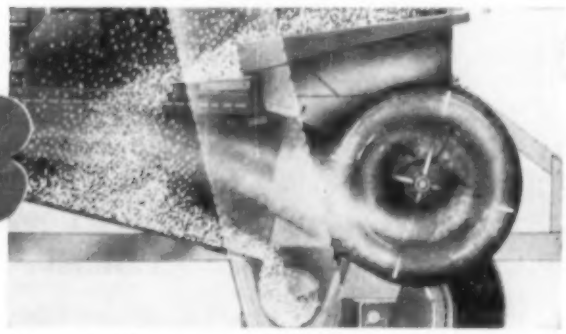
You can't beat an MM Sheller for making quick low-cost chores out of big shelling jobs. Per hour output of up to 300 bushels with the Model D, up to 1200 bushels with the Model E saves man-hours, fuel and money.



2

You shell bonus yields

MM's low-speed cylinder and steel-rod cage design give you unmatched shelling. Gentle, yet thorough action handles snapped or husked corn without bruising or cracking . . . saves your corn.



3

You deliver corn premium-clean

Two powerful fans . . . one for blast and one for suction and exhaust . . . work together over the full length of the MM cleaning shoe. This two-way fan action puts corn in the bin clean . . . free of dust, trash and husks.

4

You bank big custom profits

When your own corn is in, you go right on making money by shelling for your neighbors. Both Model D and Model E Shellers are easily portable, both available for belt or PTO.

MODEL	BUSHELS PER HOUR	POWER EQUIPMENT
MODEL "D"	Up to 500 (husked corn) Up to 200 (snapped corn)	Power Take-Off, Belt, or Special Engine.
MODEL "E"	Up to 1200 (husked corn) Up to 1000 (snapped corn)	Power Take-Off, Belt, or Special Engine.

PICK YOUR MODEL OF THE NATION'S NO. 1 SHELLER!

MINNEAPOLIS-MOLINE

MINNEAPOLIS 1, MINNESOTA *Trusted quality since 1825*

SEE YOUR MM DEALER FOR THE COMPLETE PROFIT FACTS!

For feeds that BUILD PROFITS from roughage

Your cattle produce more meat and milk from roughage when you feed them a balanced supplement containing PROCADIAN* Urea Feed Mixture. The Urea nitrogen provides a quickly-available source of protein that stimulates the rumen bacteria to grow rapidly and to digest more of the fiber in roughage and grain. You get the greatest benefit from PROCADIAN Urea in feeds that also provide balanced minerals and some quickly-fermentable sugars and starches.

Make sure you unlock these extra feed values from the grain and roughage you feed to beef cattle and dairy cows. Get feeds containing Urea to get the top feed efficiency that produces bigger profits from meat and milk. Better wintering over and better calf crops in beef breeding herds are another big advantage with feeds containing Urea.

What's coming? Lots of expectation in faces of Marc, seven, Richard, five, John, three, and Jill, one. On the John Harding farm, Polk county, Iowa.

INSIDE STUFF

STINGY HUSBANDS try to avoid buying new electrical appliances for the home. They even say: "Nope. Our old wiring won't stand another gadget. Too bad but that's the way it is."

HER ANSWER, of course, should be: "Then let's rewire the whole house. You can't expect a 1935 wiring job to handle 1955 equipment."

SOME FARMERS are still hauling water. That's why the Iowa ASC's attempt to classify well-drilling as an ACP project seems to make sense.

WILL YOUR electric toaster handle a thick slab of home-made bread? It should, but usually doesn't.

HOW MUCH noise do your boys make when they get up in the morning. My wife and I spent a night at Scattergood school, run by Friends (Quakers) near West Branch, Iowa.

THE BOYS scheduled for chores at five got up quietly and went to work. So did those on a six o'clock detail. Only at 6:40 a.m., when everybody got up, did the usual ruction break loose.

SCATTERGOOD takes about 40 boys and girls of high school age, teaches them to work together in dairy, hog house, dormitory. And teaches the usual high school subjects. We liked the children and the staff.

HOW MANY hogs next year? A farmer in Cedar county commented: "Every farmer I talk to expects the other fellow to cut down."

I MET a librarian who said TV made city children read more. They ask for books on subjects they hear about on TV. Does this happen in your neighborhood?

WHY ON EARTH did Benson and Co. buy lard as part of the $85 million campaign on pork products? Any sound buying program would try to put the emphasis on meat-type hogs, not lard hogs.

WHEN YOU'RE picking out Christmas gifts, consider buying a three speed, phonograph turn-table. Plug it into the TV loud speaker and amplifier and you'll get good reproduction of records.

MAGAZINES make a fine gift too. This paper would do fine for a farm family, if you can think of one that doesn't already take it.

BEST GIFT of all—for some folks—is a book. You can buy good ones all the way from a 25-cent paperback to hard covers at three to six dollars.

CHILDREN like to read over and over the books they enjoy. How many children's books — not comic books — do your children own?

DONALD R. MURPHY.

Voice of the farm

"Time To Dig A Hole"

To the Editor: It's time to dig a big hole. If each hog farmer had a hole to put every fourth hog in as he loads them up for market he would get home with more money.

. . . . Let them pay for their food. They won't go hungry. They'll buy shorter cars . . . . and we can buy the long cars.—Art Loucks, Mower county, Minnesota.

Wants Production Payments

To the Editor: The production payment plan is the only solution for the support of perishables.

When farmers are desperately in need of money, it is the only way to get money to their hands directly. That was one of the fine features of Wallace's AAA. It got money directly to the farmers—so that they could pay their interest, taxes and save their homes.

The present program to buy canned pork from the packers will put 85 million dollars into the pockets of the packers—and not one cent into the hands of farmers.—O. C. H., Madison county, Iowa.

Must Have Controls

To the Editor: There is only one way to have a workable program. And that is to go back to government controls.

Perhaps this is not the way most of us would like to have a program operate. But if we're afraid of government controls, then we are afraid of the government itself. And that seems to be a safe place for investments even tho there is a large debt.

Controls on farmers would not be enough either. We would have to have controls on the things we buy, as well.

Neither high supports nor flexible supports will work without controls. Either the government controls, or control yourself and go broke.—J. Peter Jensen, Adair county, Iowa.

Leave Hogs Alone, He Urges

To the Editor: In regard to the hog market, let supply and demand take care of it. Let the ones that have wrecked the market take their medicine.

I know it is going to hurt the little fellow. But I'm not in favor of helping the fellow that has his farm covered with hogs.—Isaac Swain, Keokuk county, Iowa.

Against Farm Price Supports

To the Editor: I am not in favor of government supports on anything that the farmer has to sell. If we did not have government supports, we could be getting $1.30 to $1.50 per bushel for corn right now.

If we have to have controls, the acreage plan is no good. Because when a farmer takes a few acres out of production, he will use enough fertilizer to raise just as many bushels as he would have otherwise. . . .

If the government would concentrate on getting an outlet for what we raise, we farmers will get along fine.

In 1896, I saw my father sell corn for 11 cents per bushel . . . . and he got by. — Thomas A. Woode, Will county, Illinois.

Hired Man's Wife Sounds Off

To the Editor: In regard to "Why Remain a Wife," (November 19).

I was a hired man's wife. We moved to a farm house and worked as tenants. The house was in bad shape and needed repairing. I fed the carpenter two lunches and one meal a day. Helped put on . . . . wall. I was given a used refrigerator for my work and the meals which I fed the carpenter.

After three years, the boss decided he could do without us. We moved the refrigerator, thinking it was ours. Then he came and took it back.

So if that farmer's wife thinks she has it bad, I do too. And I'm just a—Hired Man's Wife, Hardin county, Iowa.

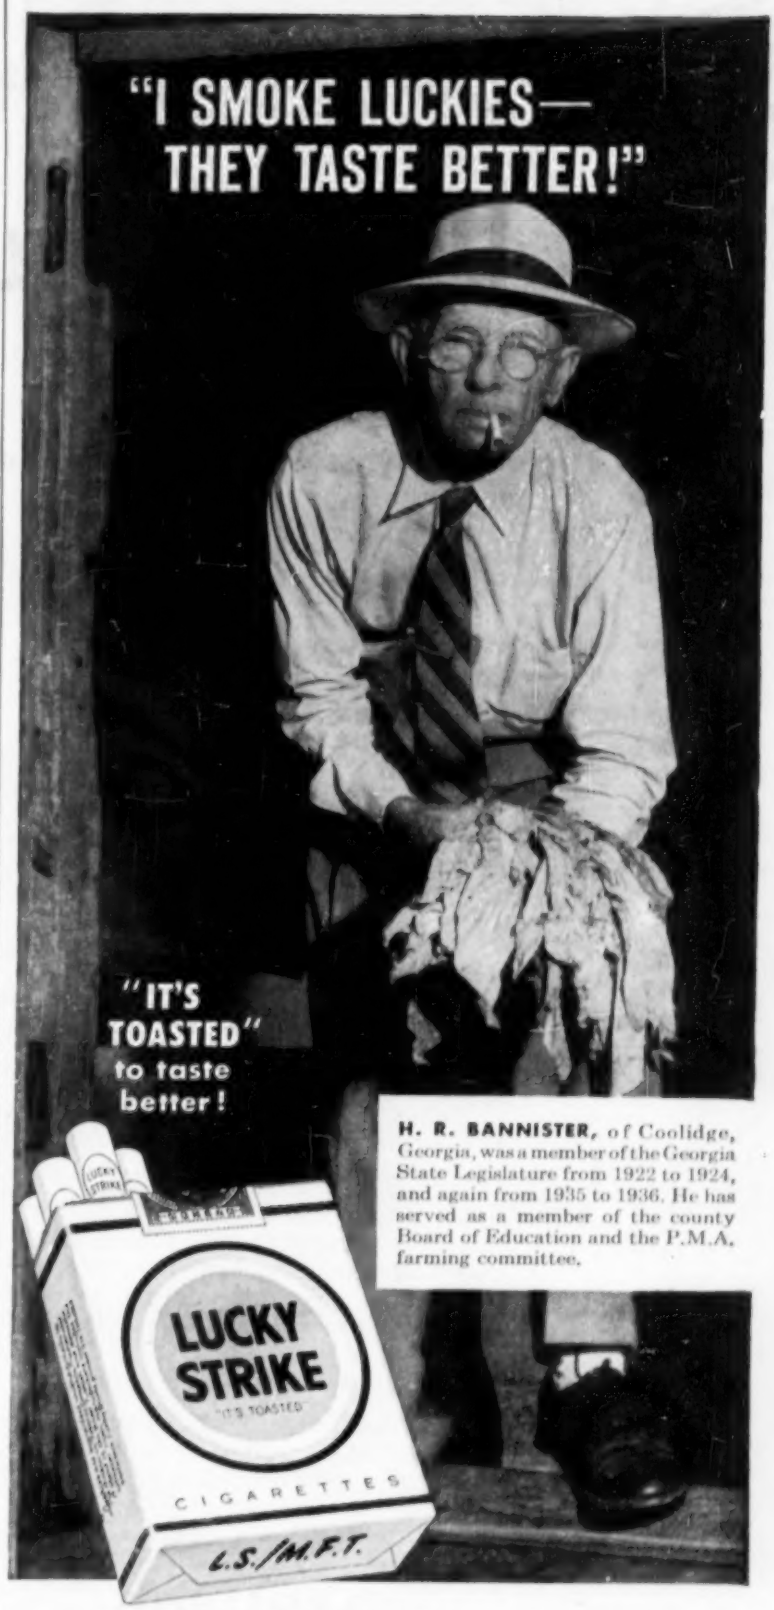
Says Property Tax Is Unfair

To the Editor: Property tax hits the farmer hard. I think our property tax is the most unfair tax we have. It really penalizes the farmer for doing any improving. Everytime you try to fix up your farm . . . . up goes your taxable valuation, which means more property taxes.

. . . . I would like to see income tax and sales tax replace part of property tax. A reasonable amount of property tax would be all right if it were equal on all farms.

I know some farmers are paying too much property tax, according to their production, just because they have good buildings.—"Tired Farmer Who Can't Afford To Retire," Linn county, Iowa.

"For heaven's sake, Pa, put up the sign and come to the house."



H. R. BANNISTER, of Coolidge, Georgia, was a member of the Georgia State Legislature from 1922 to 1924, and again from 1935 to 1936. He has served as a member of the county Board of Education and the P.M.A. farming committee.

"Luckies have a flavor I can't find in any other cigarette."

H. R. Bannister has been a tobacco grower for more than 30 years—and he's a Lucky smoker from 'way back.

"I don't remember when I first started smoking Luckies," he says, "but it was sure a long time ago. I smoke Luckies because they taste better. They have a flavor I can't find in any other cigarette."

Luckies taste better, because Lucky Strike means fine tobacco. Then *"It's Toasted"* to taste better. Next time you light up, make it a Lucky. You'll say it's the best-tasting cigarette you ever smoked!

LUCKIES TASTE BETTER

Farm News Briefs

SIX IOWA extension workers with long records of service were honored by their co-workers early this month. Receiving the Iowa Certificate of Recognition from the extension workers were Myrtle Hewitt, Humboldt county extension home economist; Mrs. Helen Whittington, Clinton county home economist; Robert E. Hall, Delaware county extension director; and E. P. Sylwester, state extension weed control specialist. Mrs. Whittington and Sylwester were also recognized for long service as were Miss Helene Dilger, Mahaska county home economist, and LeRoy Brendeland, Kelley.

▾ ▾ ▾

FOR "exceptional service to safety on the farm," Wallaces' Farmer and Iowa Homestead received the National Safety Council's Public Interest award. Presentation was made in Chicago on Nov. 30.

▾ ▾ ▾

MANY Iowa farmers are taking advantage of federal loans on grains, Dwight Meyer, chairman of the state ASC committee, reports. From harvest-time to mid-November, county ASC offices completed 1955 crop loans on more than five million bushels of corn, 6.2 million bushels of oats, 4.9 million bushels of soybeans, and 1.5 million bushels of wheat. In similar period last year, 1954 crop loans had been made on 170,000 bushels of corn, 5.3 million bushels of oats, 769,000 bushels of wheat, and three million bushels of soybeans.

▾ ▾ ▾

NUMBER of farms in the United States declined by 600,000 from 1950 to 1954, according to Bureau of Census. Number of farms in 1954 was 4,782,393, or 11.1 percent less than the 5,382,162 farms in 1950. Number of farms in Iowa dropped from 203,159 in 1950 to 192,933 in 1950, a decline of five percent. Illinois farms numbered 175,543 in 1954, down 10.1 percent from 1950. Missouri farms dropped 12.4 percent in the same period to a 1954 total of 201,614.

Y., January 4-5; American National Cattlemen's Association Convention, New Orleans, La., January 9-11; Farmers Grain Dealers Association of Iowa Convention, Des Moines, January 23-25.

"Oh, dear! Henry and the mule are feuding again!"

Too much fat on beef?

Big differences between finished animals show up in carcass contest at Chicago International

FARM FOLKS at the International Livestock Exposition had a chance to look under the skin of meat animals. But it took real persistence to make good on the opportunity.

A lot of folks should have been interested. It is the red meat under the skin and outside fat covering that sells in the grocery show case. Whether an animal had rough hair or an off color no longer matters after slaughter.

Carcass classes of hogs, sheep and cattle were judged on foot in the show ring. Judging was done on the basis of expected carcass value—not on show ring standards.

Then the animals went to packing houses for slaughter. There the carcasses were rated on basis of yield, meat quality, trimness and other characters affecting value.

Judges of the live hogs did pretty well. Top barrow on foot had the reserve champion carcass. Second barrow in the same class dressed out the top carcass tho he was not a champion on foot.

In both light and middle weight classes, six of the top 10 animals on foot placed in the top 10 carcass listings. Judges missed on more of the heavy weights.

Live judging seems to be on the right track. But this is no time to ease off on efforts to improve correlation of live judging to actual carcass cut out.

Beef judging probably has farther to go in this respect. But a few folks influential in livestock circles are sparking an interest in this.

Maybe beef breeders will soon be following the footsteps of meat type hog men. The most desirable animals seem to be those that hang a high quality carcass without a thick, wasteful covering of fat.

That's why it is so encouraging to see even a few folks take a real interest in carcass investigations.

Already, these workers have seen enough to raise questions in their minds: Should we be raising longer-bodied, middle-of-the-road types that produce high quality beef with a minimum of wasteful, outside finish? Are there strains or bloodlines within each breed that carry the ability to produce high quality meat with little waste fat?

Top beef carcass came from a steer that placed second in its class. The steer with second carcass rated 11th in its class on foot.

Both animals turned out high quality, meaty carcasses.

Champion and reserve champion carcasses were placed in a small display cooler for public viewing.

But relatively few folks saw them. Even fewer saw carcasses of the entire classes hanging in packing house coolers. That's where the real story was.

Few folks could spot much difference between the top carcasses. Both hog carcasses made good, meaty cuts. But neither was truly outstanding. Loin eye (cross section of muscle often used for pork chops) measured 4.24 square inches in the top carcass.

Earlier this year at the National Barrow Show, many hogs had better than five square inches of loin eye. And some more than six.

Backfat thickness was 1.5 inches for the top carcass. That's more than necessary. But far less than the average hog. If all hog carcasses were like these two, the pork industry would have a much smaller lard problem.

Cattle carcasses in the packer's cooler showed that beef producers have many of the same problems.

The 64 carcasses—big increase from last year—showed a wide range in fat covering and in meatiness. Even to the untrained eye, it was obvious that thick covering of fat (high finish) did not insure well marbled meat.

Fat covering varied from a trim half inch to a wasteful inch and a half. Some of the trim carcasses carried heavy muscles with good marbling.

Differences were easy to see. Wide range among these animals competing for title of carcass champion was amazing.

It was well worth the trouble it took to find out where the carcasses were on display. And to go the few blocks out of the way to see them.

Take time to check the carcass contest yourself next year. The public is welcome. There should be signs with directions for finding the coolers. That's where you see the real proof of the pudding.

Carcass contest winners

Beef champion—Junior yearling Angus shown by Golden Dawn Farms, Carthage, Ind. Reserve—Summer yearling Angus shown by Orville Thom, Winthrop, Iowa.

Hog champion—212-pound Poland China shown by John L. Fox, Shelbyville, Ind. Reserve—214-pound Berkshire shown by Purdue University, Lafayette, Ind.

For less than 3/4¢ per week

per steer you can insure a healthier herd and healthier profits! (Based on the national average salt requirement per steer)

Just that much more is all it costs to feed a steer Morton Trace Mineralized Salt instead of ordinary salt

A healthy steer packs on more weight with less feed . . . finishes out better . . . sells higher.

To *insure* good health, you should feed all your steers Morton Trace Mineralized Salt.

Morton T-M Salt provides the sodium and chlorine your livestock must have, plus adequate amounts of vital trace minerals: iodine, cobalt, copper, iron, zinc, and manganese.

Most farm land lacks one or more of these essential trace minerals. Lack of any one can cause poor health . . . poor weight gain . . . lack of bloom.

Feeding trace minerals with salt is the surest, most economical way to guarantee an adequate supply. Morton Trace Mineralized Salt is inexpensive. All animals like it, will eat it readily every day. When they do, they get the salt they crave, plus the trace minerals they need.

To assure proper mineral balance, build your mineral feeding program around Morton T-M Salt. It's essential to a sound, economical mineral program—whether or not you feed a major mineral supplement. Its cost is so slight—the protection it offers so valuable—it is the only kind you should use.

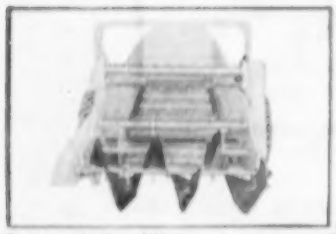
Just be sure to feed it to your animals free choice. You know they need it. They know how much.

MORTON T-M SALT
Trace Mineralized Salt

AT YOUR FEED DEALER'S IN BAGS AND BLOCKS

only the MINNEAPOLIS-MOLINE MODERN MACHINERY LS-300 SPREADER

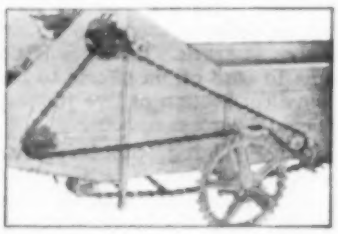
gives you all these performance advantages

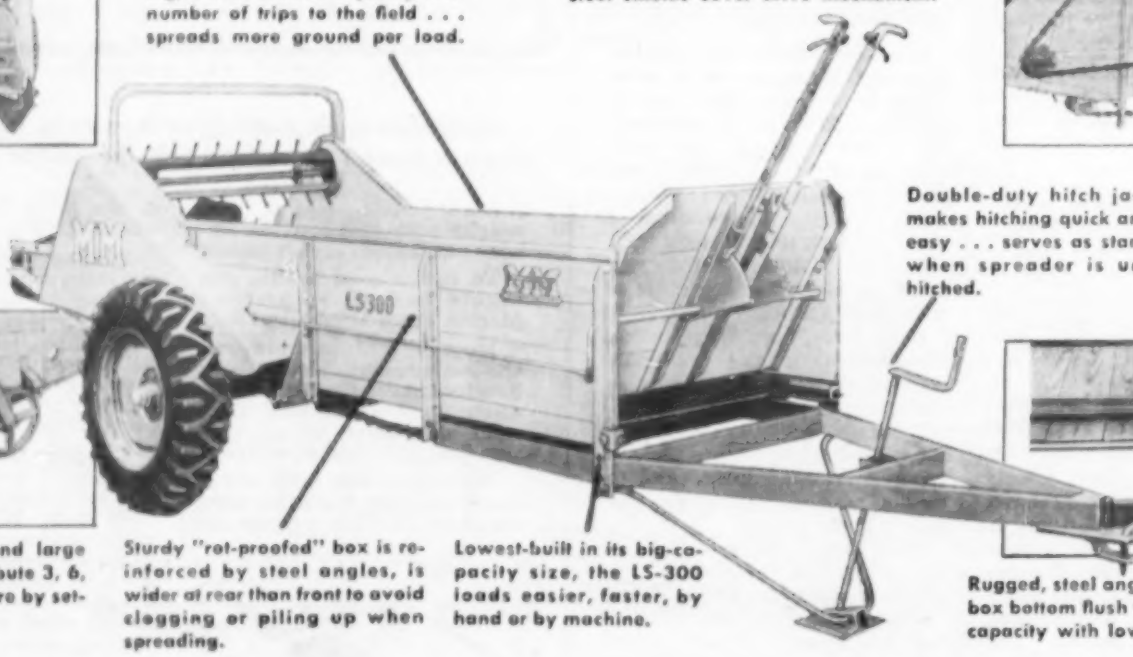


Patented shredding-pulverizing action of distributor tears clumps of manure to bits . . . spreads evenly.

Big, 75-80 bushel capacity cuts number of trips to the field . . . spreads more ground per load.

One heavy-duty, self-tightening steel chain drives distributor beaters. Sturdy steel shields cover drive mechanism.



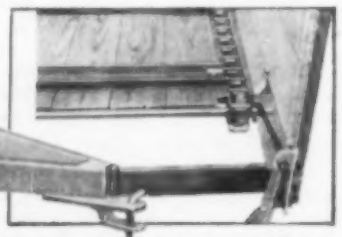


Double-duty hitch jack makes hitching quick and easy . . . serves as stand when spreader is unhitched.

Three-lobe feed cam and large cam roller let you distribute 3, 6, 9, 12, or 15 loads per acre by setting a lever.

Sturdy "rot-proofed" box is reinforced by steel angles, is wider at rear than front to avoid clogging or piling up when spreading.

Lowest-built in its big-capacity size, the LS-300 loads easier, faster, by hand or by machine.



Rugged, steel angle frame makes the box bottom flush with the sills for big capacity with lower side-boards.

Management help for you?

by **Al Bull**

MANY Corn Belt farmers are getting expert help on management problems—usually for less than $50 a year.

Farm Business Associations in Iowa, Farm Management Associations in Illinois, Balanced Farming rings in Missouri, and now, Farm and Home Planning programs. All are aimed largely at one goal—better farm living thru improved management.

But does it work out that way? Let's take a look at some folks who have tried a few years of Balanced Farming help.

J. A. Brassfield, Jr., of Grundy county, Missouri, made the shift from grade C to grade A milk on borrowed money.

But the extra income is paying off the debt on a milking parlor, milk house and deep well. Soon it'll be added cash for other farm use.

"Last year, Brassfield's 35 cows averaged 45 pounds more butterfat than the year before," points out John Morehead, leader of Grundy county's Balanced Farming ring.

Better records, close culling, improved feeding and artificial insemination made the difference. That puts Brassfield a lot closer to his goal of 40 cows averaging at least 400 pounds of butterfat.

Family living is a major part of the Brassfield plans.

"We aim to have the farm producing enough so we can send the children thru college," says Mrs. Brassfield.

There's a similar story of increased production and efficiency on most farms in the program.

Richard C. Hargrave of Livingston county, Missouri, says, "We listed the things we wanted from the farm. Then, with Balanced Farming help, figured how to get them.

"I made many of the changes our plan called for. And I'm dollars ahead of where I would have been otherwise."

He shifted from a cow and calf herd to beef feeding. Long time records show more profit there. And it better fitted the low roughage production of his 120-acre farm.

He added to the size and efficiency of the hog and chicken enterprises. Extra fertilizer boosted crop yields. Most of the land is contoured and terraced now. Numerous improvements were made to the home and farmstead.

"I've slowed down the improvement program now. Drouth and low prices weren't included in the plans," he admits.

Balanced farming helped Richard C. Hargrave, Livingston county, Mo., thru the drouth. Extension agent Frank Miller at left.

But he figured Balanced Farming still held its full value. The fields and business were in better shape to stand up under unexpected reverses.

Mr. and Mrs. F. G. Tweedie of Carroll county, Missouri, are enthusiastic about Balanced Farming help in planning their new house.

It was placed to fit into a complete farmstead plan. Other new buildings will be located according to the same plan.

"We even planned a place for every piece of furniture," says Mrs. Tweedie. "We changed to a one-story house, too. And am I glad now! I can't think of a thing I would change."

Son Tommy Tweedie has a good word about Balanced Farming, too:

"Sure you have a plan to follow. But you make the plan yourself. And it is flexible enough to change as you go along."

Then he adds, "It helps to have someone take an objective look at what you are doing. And to know where you can get sound advice when a new problem comes up. Balancing Farming help is worth a lot more than we pay for it."

Other farmers seem to agree. Same for those using the somewhat similar systems in Iowa and Illinois.

Any increase in efficiency is a big help during this cost-price squeeze. Maybe you'll want to check up on what some record and management help can do for your farm.

Homemakers get Balanced Farming help, too. Here's leader John Morehead helping Mrs. J. A. Brassfield, Jr., of Grundy county, Mo. Nancy Brassfield is age two.

Editorials...

Man at the Mike

Dan Turner of Corning, organizing speaker for the National Farmer's Organization (NFO), tells a sale barn crowd: "We are fighting for an idea—justice for farmers."

A Bonus For Sows

WHEN HOG PRICES last month went right past the expected rock-bottom mark of $12, a high-level demand for buying sows and gilts was inevitabe.

But farmers were somewhat amused at the identity of the advocate—Senator Bourke Hickenlooper of Iowa, a backer of flexible prices and ordinarily conservative on farm legislation. And they also were somewhat astonished at the size and looseness of the Senator's proposition.

In brief, "Hick" proposed that the government spend up to $150 million on bonuses for female hogs within a period of four to six weeks. He suggested something like $5 to $7.50 per 100 pounds so as to make a really sizable dent in spring farrowings and also to help farm income immediately.

The looseness of his scheme became apparent when he said that these sows and gilts did not necessarily have to be "piggy." He also said nothing about weight or age limits.

Will owners of hogs now ready for market now be encouraged to sort out gilts for later sale under the bonus plan? Holding these animals would add weight, but the penalty for an additional 100 pounds has recently been less than $2 per hundred.

To level 1956 farrowing most effectively, the plan probably should remove animals due to farrow in late March, April and early May. But how can you tell about this unless they are required to be "piggy" and not bought until, say, February or early March? Meanwhile, how do you foreclose on a certain amount of mischief with boars?

Nevertheless, the buying idea makes sense under present circumstances, just as it did in the fall of 1933. And undoubtedly the Department of Agriculture can be depended on to tighten up any loose screws if it goes ahead.

If They Sold

LAST MAY, the Wallace-Homestead Poll asked Iowa farmers what they thought they'd get for 1955 spring pigs. The bulk of the farmers questioned — 77 percent — guessed somewhere between $15 and $18.

Only three percent were pessimistic enough to guess $12 or less.

Farmers who now have hogs headed for the winter market may derive a little hope from those May predictions. At that time, over 80 percent of the farmers interviewed expected to sell their spring pigs a little on the early side, that is, before January 1.

If they carried out their plans, hog shipments in January and February accordingly will be somewhat lighter.

A Christmas Extra

HERE'S ANOTHER way to help move surplus foods to needy people and at the same time make your holidays a little happier.

Send $5 or $10 to CARE, 660 First Ave., New York 16, N. Y., the well-known non-profit international welfare agency.

Is It Efficiency?

Record individual output has brought a national waste

IN THESE last few years, while working around the farm, I gradually came to detest the word "efficiency."

I met it at every turn. Be more efficient, the economists said. Researchers nearly overwhelmed us with new ways of raising crops and livestock.

Each year, more and more city people were being fed and clothed by one farmer. Each year, farm population dropped off. This was generally looked on as a good thing, altho it wasn't clear that these migrants all wound up doing something really useful.

As time went on, a neighbor raised more bushels because he farmed more land, but I was ahead on acre yields. Which of us was more efficient?

I couldn't prepare and plant ground as fast as another man because I contoured and kept grassed waterways. From the standpoint of hours put in, I was less efficient. Or was I, when you thought of the future?

Still another man lost his lease and eventually wound up working as a hired man on the same farm. In company with the new operator, a digger type, he probably produced more than before. But he was not as well off. A more efficient set-up maybe, but was it as fair?

As surpluses piled up and prices dropped, it became clear that our headlong sweep of individual efficiencies had created a monstrous national inefficiency. A lot of us were overworking ourselves, wearing out our machinery and abusing our land to produce an unwanted excess.

We had even lost track of which way we were moving. On our own places, practicing individual efficiency, we still had a feeling of moving ahead, but as a group we were in fact drifting backwards. Considering how yields had outrun population, it sometimes looked as if efficiency was causing us to fall back even faster than otherwise might have been the case.

Men with their hands already full pondered the question: Should we expand operations and hire more help? Some did this. But some shrank from this final stage in the efficiency drive, because it meant crowding out others.

When I started working in town again, I was reminded in yet another way of the self-defeating nature of uncoordinated efficiency. By farm standards, I would hardly be under way when downtown workers would stream for home. Their work week was down to 40 hours, a reasonable enough limit in this highly productive economy.

Yet out in the country, farmers on the average were working 20 percent longer than city people. Not counting time of farm wives and children.

It just doesn't make sense. Many of us, of course, could make further improvements, and there are misfits who maybe ought to move off. But suppose we divided a million small farms among more efficient operators. Do we now need what is sure to result?

Last week a friend let me know that he was rugged and efficient enough to stand 10-cent hogs. I think probably he is, at least for a while. But why should he have to prove it? Is the U. S. in this time of unequalled prosperity unable to pay its farmers a fair share? Is it so desperate for manpower that it cannot afford the number of independent farmers it would take for a little shorter farm work week? Is your answer the same as mine?

Art Thompson.

Headed For A Wreck?

ANY CAR DRIVER would get pretty excited if he suddenly found his front wheels spraddling out. He'd know that if he didn't act fast, he'd soon be wrecked.

Do the American people realize that their big "prosperity" bus is also developing just such a dangerous spraddle?

At the recent farm outlook conference in Washington, this tendency was made shockingly clear by a simple two-line graph. One line showed the trend of total national income since 1910. The other line traced the course of farm income.

During most of these last 45 years, the two lines more or less moved up and down together. At no time were farm returns in a fully equitable relationship, but the trends were roughly parallel.

Today, that is no longer true. National income is in a steep climb. Farm income is in a dive. The more you look at the graph, the madder you get. The "spraddle" is dangerously wide, even after you allow very liberally for the decline in farm population.

Country bankers, business men who cater to farmers and just about everybody else had better begin noticing where the bus is headed.

Questioning faces like these are a common sight at farm meetings nowadays. This was an NFO gathering at Winterset, Iowa. Afterwards, a listener said, "I don't know whether this bunch can do anything either, but I'll give 'em a buck to try."

Odds and Ends . . .

. . . FARM PROGRAM IDEAS are now coming thick and fast. A South Dakota man would pay 100 percent of parity on the part of the crop needed for domestic consumption. (He was thinking mostly of wheat.) The farmer would be asked to store the rest until it had an outlet for export at the going market price. There would be no acre allotments, but the producer could get a moderate loan on his stored portion.

. . . AN IOWAN would have the government pay farmers in corn and wheat instead of money for any acres retired from production. However, he would have this stored grain valued at reduced prices, say at 75 cents per bushel for corn.

. . . AN ILLINOIS farmer would have a national farm marketing commission determine proper prices for farmers. Production on family-sized farms would get the full price. On larger farms, the price would be scaled down on amounts produced in excess of that equivalent to a family farm output.

. . . IN ORDER that Secretary Benson may know better what farmers think, Elmer Carlson of Audubon, Iowa, makes this suggestion: Let every salesman circulating among farmers carry 50 government post cards. When the conversation swings to prices—which it usually does—the salesman should pull out a card, write down the farmer's ideas, have the farmer sign and then drop it in the mail box.

. . . ABOUT ONE-HALF of midwest farmers have television sets, says the U. S. Bureau of Census. For the country as a whole, about one-third of all rural families are set owners. And why not?

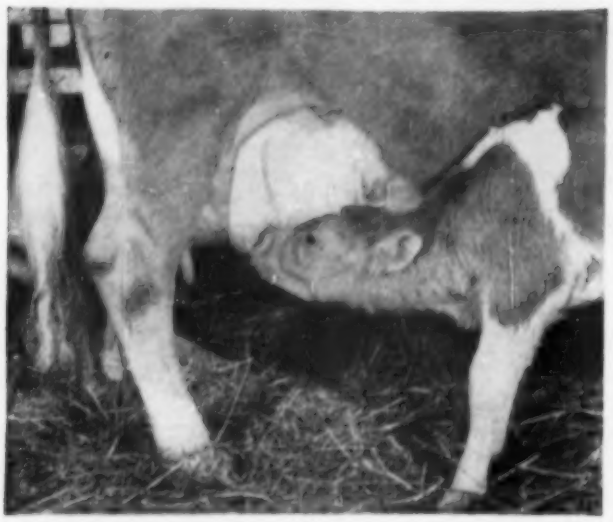
. . . CONSUMER INCOME in the second quarter of 1955 (latest figures available) was nearly 50 percent higher than for the same quarter in 1947-49. Yet outstanding consumer credit was about 74 percent greater. Farmers will ask "How come? Isn't there some way to have prosperity without increasing personal debt. And does this bigger debt hurt demand for food?"

. . . GOVERNMENTAL SPENDING is an important factor in the American economy. According to the U. S. Department of Commerce, 30 cents is being spent by government agencies in 1955 for every dollar expended by consumers. This is slightly larger than the proportion of such public spending in 1947-49 and 50 percent larger than that in the pre-war year of 1939.

Song of the Lazy Farmer

THERE'S nothing like a fireplace to wipe out ev'ry single trace of rheumatiz and other ills that old men get when weather chills. It don't take winter very long to make me feel completely wrong; the very sight of snow outside can cause an ache beneath my hide. As soon as wind starts feeling raw, that old dull pain begins to gnaw on ev'ry bone from head to toe; and if Mirandy makes me go outside to do some chores that she by rights should do herself, by gee, it's often anyways a week before my joints no longer creak.

In times like those it feels so good to pile up lots of firewood and sprawl out where the hearth can bake the tenderness from ev'ry ache. There's no sensation quite as great as feeling that heat permeate into the marrow of your bones and gently stifle all your moans. As soon as muscles all get hot enough to untie ev'ry knot, you slip into a painless dream from which your spouse's loudest scream cannot arouse you even tho she's calling you a so-and-so and claiming that your so-called aches are nothing but a bunch of fakes.



Colostrum, or "first milk," guards newborn calves from a number of ailments — especially often-fatal diarrhea. Be sure your calves get colostrum during the first four days after birth.

Colostrum can be pail-fed right from the start. Some say this is best — as it avoids set-back when calf is taken away from a cow. Pictured is Harold Hoffman of Worth county, Iowa.

Treat 'em right!

DEATH rate is high among dairy calves. About one out of every five fails to make the grade. That's on the average. Good dairymen usually do better. Pictures on this page illustrate some of the management practices that help save calves.

It's best to keep calves in individual solid-wall pens until they are eight weeks of age. Pens like the one pictured are draft free and help prevent spread of disease. Keep pen dry and well bedded. Provide hay, water and salt.

Attention can do a lot for the dairy calf. Here, Dalen Kramer of Cerro Gordo county, Iowa, checks stitches made by veterinarian in remedying a naval rupture. Always treat naval with iodine soon after birth.

After the first few days on colostrum, a commercially made milk replacer can bring calves along nicely. Mixing milk replacer is Charles Lyford, son of Vernon Lyford of Worth county, Iowa. Note nipple pail.

Grand Champions!

John F. Mommsen and Sons of Miles, Iowa, continue their winning ways. Their load of Angus steers topped the tough Chicago International Carlot Show. This is the sixth time they have shown to the Grand Championship in this event.

John Mommsen says: "The results we got this year with BP Brickle were even better than we expected. Our market cattle made the best gains ever, and our show cattle really had the bloom at Chicago and Kansas City. Our Champion Load at Kansas City dressed a record 66.9%, and our lighter Chicago cattle at 66.3%!"
"I sincerely urge club boys and girls to consider Beef Brickle for their 1956 calves!"

Mr. Mommsen and sons, Glenn and Wayne, are shown here with their winning cattle, are veteran showmen at Chicago. Their record is testimony to their feeding and fitting skill. It is significant that these cattle were fed exclusively on BP Beef Brickle!

Greatest Winnings In The
International's History!

In addition to the two Grand Champions pictured on this page, BP fed livestock won 12 more major awards.

Reserve Grand Champion Carload Cattle
(Herefords) Karl and Jack Hoffman, Ida Grove, Iowa
2nd Prize Angus Lightweight Carload

Sherman Berg, Osage, Iowa
3rd Prize Medium and Heavy Weight Carload
Fat Cattle—John Mommsen & Sons, Miles, Iowa
3rd Prize Heavy Weight Hereford Carload
Lewellyn Larson, Kiron, Iowa

Grand Champions!

Milo Wolrab of Mt. Vernon, Iowa, exhibits his third International Grand Champion Carload. Mr. Wolrab, a long time BP feeder and Berkshire breeder, has been a top carload exhibitor for the past ten years. His consistent winnings are a tribute to his knowledge and ability to produce the best meat type hogs in the land.

"FEED OF CHAMPIONS!"

32% BEEF Bickle is outstandingly different! It is a formula of oil meals and solubles, pelleted separately for identification—then mixed and processed with BPs exclusive Brickle coating to make it the sweetest and only "Three Way Feed" on the market. High Protein—Heavy Molasses—Bonded Protection, all wrapped up in one package. From the first sweet bite Beef Brickle builds a healthier appetite, completely balances the ration and puts on fast gains with a linseed bloom that no other feed can match. Try it . . . . you'll find BP has the quality you need for top feeding results.

"BP HOG FEEDS . . . Have More Quality!"

"BP has more quality" . . . is what you hear from hog raisers who know BP Hog Feeds. Feeds that are guaranteed to contain more fish solubles and animal proteins than any other feeds—yes, "BP has more quality." Successful breeders and showmen have switched to BP feeds since they were first made eight years ago, piling up a record number of championships never equalled by any other feed.

Write us today, or see your nearby BP dealer for details on the feed that is so rightfully nicknamed the "FEED OF CHAMPIONS."

JOHN DEERE

Announces a

NEW 95-BUSHEL SPREADER

and a

NEW LOW-COST QUIK-TATCH LOADER

YOUR advantages in choosing John Deere Manure-Handling Equipment are greater now than ever before. Now, with the introduction of the new 95-Bushel Model "R" Spreader and the new No. 45 Quik-Tatch Loader you can fit your manure-handling needs exactly —save money on your initial investment and on operating costs.

Once you've loaded manure with the new No. 45 Loader on a John Deere Power Steering Tractor, you'll never be satisfied with less. Tractor power not only takes over ALL the work of loading—but of steering, too.

It's really something—try it soon.

Now 3 SPREADERS to Choose from

With the new 95-Bushel Model "R" Spreader fitting into the famous John Deere line between the 70-Bushel Model "L" and the 120-Bushel, PTO-Driven Model "N," you now have three outstanding spreaders from which to choose. The new Model "R" Spreader is ground-driven . . . has all of the long-life and good-work features that have made John Deere Spreaders so outstanding in the past.

The NEW No. 45 Quik-Tatch Loader for All John Deere Live-Power Tricycle Tractors

The new No. 45 Loader goes on or off your tractor in five minutes or less—with no heavy lifting . . . has the famous John Deere hydraulic system that requires no auxiliary oil reservoir.

See your John Deere dealer soon for complete details on the spreader that best fits your needs—and on the new No. 45 Loader—the loader that fits your pocketbook.

Seed Salesmen Active

To the Editor: A seed salesman came by the house recently. He said if I'd buy 30 bushels of his oat seed his company would buy all the oats that I raised for 20 cents per bushel above market price. I insisted on reading the contract before signing it. He finally got mad and left. I hope that all farmers read the contract before signing it. What do you think of a deal like this?—F. G., Fulton county, Illinois.

Most seed salesmen are honest. But they will gladly let you read the sales contract. They won't try to rush you into a sale.

You should buy seed that are recommended for your area by your extension service. Your local seed dealers usually stock the best recommended varieties.

Must Register As Employer

To the Editor: I hire two full-time farm workers. What must I do before paying their social security taxes?—H. T., Macon county, Missouri.

You must register as an employer with your nearest district internal revenue office. You can get application blank from the social security office or the reveenue office.

You will be assigned an employers number. This number will be used when reporting social security tax for your employees.

To Be Eligible For Old-Age Help

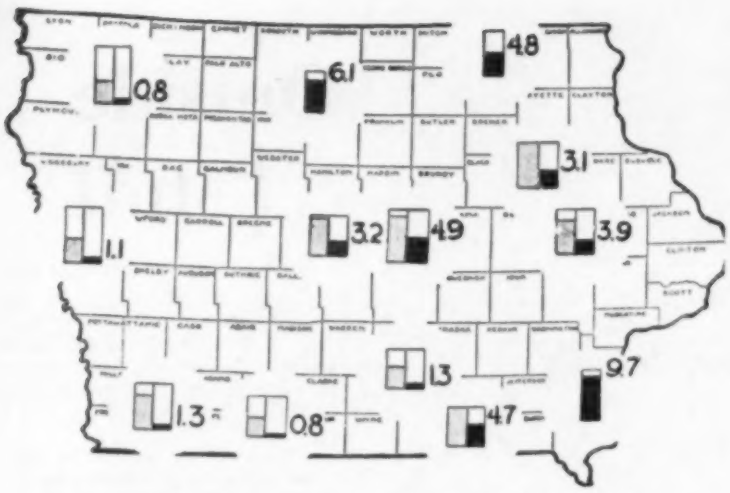
To the Editor: How long does a person have to live in Iowa to be eligible for old age assistance?—Mrs. J. V., Mower county, Minnesota.

To be eligible for old-age assistance in Iowa, a person must have a residence in the state for five out of the nine years immediately preceding the application. And the year prior to that date must have been continuous.

Also he must be 65 years old, with adequate proof of age. And he must have been living in the United States 25 years immediately preceding the application.

Play It Safe!

Repair bills haunt Norman A. Doyle Neglected to change Transmission oil. —Beth Wilcoxson



Subsoil moisture was measured at the 13 locations shown. Number with each bar graph shows amount of moisture available to plants in top five feet of soil. Black portion shows relationship of that amount to total capacity of soil to store available moisture. Where two bars are shown, the one to the left shows subsoil moisture available a year ago.

Dry fall hurts crop outlook

Subsoil moisture is short in most of Iowa. Here's what it means for next year's crops

PROSPECTS for a good crop look a little dim right now. The reservoir of moisture in the soil is about dry in most parts of Iowa.

Normal crop season rainfall is just enough to make a good corn crop—if it comes at the right times. Better than normal distribution is needed.

July and August usually get less rainfall than corn needs. During those months, corn roots may dip five feet or more into the subsoil for water.

The top five feet of most soils can be expected to hold about 10 inches of available water. This pulls corn thru July and August in spite of high water needs.

But this year, most of Iowa has had seven consecutive months of below normal rainfall. Crops drained the subsoil moisture to make up the shortage.

There's been little moisture for a refill.

Iowa State College workers sampled subsoil moisture at 13 locations over the state.

Only southeastern Iowa has a good moisture supply. One north central location showed about half a full supply. The rest of the state is nearly dry.

Now, what are the chances of filling the water reservoir in the soil before next July and August?

Again, the prospects are not bright. From the first of December thru March, Iowa normally gets just over five inches of water.

Last year, just over five inches of moisture fell between fall and spring subsoil moisture samples. But there was a net loss of about a third of an inch of water from the soil.

Odds for getting much of this winter precipitation into the soil are pretty slim. When surface soil is frozen, January or February thaws let much of the winter moisture get away. A fast thaw in the spring can just about complete the loss.

Of course, spring rainfall could make up the shortage. That's something to hope for. But average rainfall for April and May is less than seven inches. And you can't count on all of that soaking into the soil. Many areas are lucky to save even half without contouring and terracing.

So subsoil moisture is short. And chances for replacing it are slim. What does that leave for you to do?

That depends on your own farm setup, of course. You may want to hold over an established seeding if moisture is still short at plowing time.

Spring moisture is usually enough to start a seeding. But keeping it thru July and August could be difficult.

At corn planting time, you might want to switch some acres to sorghum or soybeans. Sorghum takes about as much total moisture as corn. But it isn't quite as particular about when it gets the moisture. Soybeans get by with a little less.

With low subsoil moisture at planting time, you'll want to give up any idea of shooting for 100 bushel yields. Heavy use of fertilizer and thick planting can be cut back accordingly.

That doesn't mean to cut fertilizer entirely. Fertilizer dollars stand a good chance of being the best ones you can spend next year.

About the middle of April, more subsoil moisture samples will be taken. These will give a better idea of conditions just ahead of planting time.

Or run a post hole auger down to about five feet, and you'll get a good idea of moisture conditions on your own farm.

MOEWS GIANT-EAR VARIETIES

You don't have to risk over-thick planting to get a record yield from these varieties. If season is good, they'll stretch cobs, fatten kernels. "Capacity" is bred into them. You'll get ALL the corn your land can feed and water, with normal rate of planting.

The ear in the picture is from Eddie C. Kelley's field of Moews 524A at Sheffield, Illinois.

There's a Moews Giant-Ear variety for most all maturity requirements.

There's many a man who could rightly envy Vern Clark of St. Charles, Minnesota. He has achieved what many a man strives for. Success as a farmer . . . Success as a father . . . Success as a community business man.

The success of his farm is immediately evident in 340 well-kept acres . . . rich, fertile land supporting 28 Hy-Grade Holstein Cows and yielding top harvests of corn, grain, and hay.

And community success? . . . For 15 years he's served as President of the St. Charles Co-op Creamery.

Success as a father? One son is an X-ray technician with the Mayo Clinic, another manages a furniture store, and a third helps run his successful farm.

Of course, there *were* tough years. In fact, Vern Clark often tells about the really rough year that the Cities Service credit department saw him through. Since 1924, over good years and bad, he's stayed with Cities Service and Cities Service has stayed with him . . . and each is mighty happy with the other.

For his entire mechanized fleet—tractors, elevator, combine, pick-up truck and automobile—nothing will do but Cities Service Gasolene, Oils, and Greases. Currently using C-800 Motor Oil in his tractors, Clark says: "It's kept my engines in top condition far longer than I'd expected." But his praise doesn't end with Cities Service Products. Here's what he says about his distributors: "During my 31 years as a Cities Service customer, I've had the opportunity to deal with three different Cities Service distributors—and each has given me the best possible service."

On farm after farm, the story varies but the praise is the same . . . praise for the unsurpassed products and business methods of Cities Service. Why not enjoy these benefits also? Talk with your local Cities Service Distributor. Or write: Cities Service Oil Company, Sixty Wall Tower, New York 5, N. Y.

Milk from 28 Hy-Grade Holsteins is top quality at Clark Farm. In addition, farmer Clark raises corn, hay and grain on his 340 acres.

31 Years a Cities Service Customer, Clark depends on Cities Service Products for all his mechanized equipment. His reasons: Cities Service has best products, best distributors.

DEPEND ON MACHINES FOR YOUR FARM AND ON CITIES SERVICE FOR YOUR MACHINES

QUALITY PETROLEUM PRODUCTS

Outside stuff

DID you know that lots of Germans — particularly in the mining areas—prefer lard as a spread for bread? They want nothing to do with margarine—so long as they can get lard at a reasonable price.

I picked up that bit of information in visiting with a fellow named John J. Haggerty. He returned to the U. S. recently, after a tour of duty as agricultural attache to Germany.

Haggerty reports that our lard market in Germany is picking up. Of course the German market, alone, can't solve our lard problem. But it's an encouraging note. Even the best meat-type hog still has some lard in him.

• • •

NOTE of disillusionment: A pretty little 4-H club girl who led a champion out of the showring at the International Live Stock Show couldn't tell me what kind of a ration her calf had been fed.

I'll bet, tho, that her dad could have told me.

And for that matter, I'll bet that a lot of youngsters who showed red ribbon calves at county fairs this year learned more about the practical aspects of cattle feeding than did the pretty little girl with the champion.

SINCE J. J. Newlin wrote about his old Seth Thomas clock which his family brought to Iowa in 1849, we've had several comments.

Harry Crawford of Tama county, Iowa, writes that he has a similar clock which his grandfather bought second hand. He knows it's more than 100 years old.

And Mrs. Bertha M. Page Pos of Boone county, Iowa, reports that she has two Seth Thomas weight clocks. Both were brought to Iowa from Indiana in 1851. One by her grandfather. The other by her great grandfather.

Two top carloads of fat cattle at the 1955 International Livestock Exposition came from Iowa feedlots. Grand champion carlot were the Angus above entered by John F. Mommsen and Sons, Miles, Iowa. Reserve champions were the Herefords below owned by Karl and Jack Hoffman, Ida Grove, Iowa.

At International

Midwest breeders and feeders showed many of the prize-winning entries

IOWA livestockmen, young and old, made a pretty respectable showing at the 1955 International Livestock Exposition at Chicago. And many of the prizes that escaped Iowa exhibitors went to neighboring breeders and feeders in Nebraska and Illinois.

In the International junior livestock feeding contest, grand champion honors went to an Angus summer yearling shown by 16-year-old Nancy Turner of Champaign county, Ill.

The Hereford junior champion shown by Lewis Schoening, Clinton county, Iowa, was named reserve. Champion junior Shorthorn belonged to Linda Yoakum, Keokuk county, Iowa. Reserve champion junior Shorthorn was shown by Sherman Berg, Mitchell county, Iowa.

Another feature of this year's International was the annual battle between two veteran show cattle feeders—John F. Mommsen and Sons of Miles, Iowa, and Karl and Jack Hoffman of Ida Grove, Iowa.

A load of 1,025-pound Angus won the carload grand championship for the Mommsens. The Hoffmans' load, which was named Hereford champion, took the reserve championship. Champion Shorthorn carlot was entered by Fred Weber & Son, Geneseo, Ill.

Other Iowa carlot entries that placed were from William Gradert, Bryant; Hugh Morris, Ainsworth; Leo Gannon & Sons, Delmar; Ernest Turin, Kiron; Lewellyn Larson, Kiron; Roy Gorsuch, Marshalltown; C. E. Woods, Spencer; Schmidt Bros., Delmar; John Mommsen, Jr., Miles; Miller Bros., Ogden, and Walter & Winston Wessell, DeWitt.

Carlot hog championship of the show went to a veteran Iowa hog breeder and feeder, Milo V. Wolrab of Mount Vernon. Wolrab's Berkshires edged out a load of Poland Chinas entered by Walter Schlichting & Sons, Apple River, Ill., which took the reserve spot.

Champion barrow of the open class was a 204-pound Hampshire owned by McGuire Hampshire Farm, Wisner, Nebr.

In the open class steer show, the junior grand champion owned by Nancy Turner again went to the head of the list.

A Shorthorn weighing 1,150 pounds entered by the University of Kentucky was chosen reserve champion.

Iowa State College showed the reserve champion open class Angus steer, and the reserve champion Shorthorn steer. Lewis Schoening of DeWitt, Iowa, won the reserve Hereford championship on the steer which had previously been named reserve grand champion of the junior show.

Mathers Bros., Mason City, Ill., continued their winning ways at the International Shorthorn show. Mathers had the junior and grand champion bull, senior champion bull, reserve senior champion bull, senior and grand

champion female, and reserve junior champion female.

Reserve senior champion Shorthorn female was shown by George Struve & Sons, Manning, Iowa. They also had the first place senior yearling bull.

Champion bull in the International Hereford show was shown by Portage Farms, Woodville, Ohio. Hi-Point Farms, Brighton, Mich., showed the champion Hereford female.

Adams Bros. & Co., Odebolt, Iowa, had the first place two-year-old Hereford female with ABC Homemaker 15th.

J. Garrett Tolan Farms, Pleasant Plains, Ill., had the International grand champion Angus female with Genettmere.

Grand champion Angus bull was a senior calf owned jointly by Ankony Farm, Rhinebeck, N. Y., and Millarden Farms, Annville, Penn.

Tolan had the reserve senior champion bull.

Hahn Heads Iowa Extension Men

New officers of the Iowa Association of County Extension Directors are Grover Hahn, president; Truman Nelson, Boone, vice-president, and Gress Rogers, Toledo, secretary-treasurer.

Elections took place at the group's annual dinner and meeting early this month.

New directors elected by the association include Ed Darrow, Osage; David Fenske, Audubon; John Henderson, Maquoketa, and Jim Goode, Corydon.

Paul Barger of Waterloo, who completed four years as secretary of the National Association of County Agricultural Agents, and J. A. Partridge of Independence, who served four years as publicity chairman for the national group, were awarded plaques in recognition of their service.

YOUR CHILD MAY HAVE PIN-WORMS

1 OUT OF 3 DOES!

Fidgeting, nose-picking and a tormenting rectal itch are often telltale signs of Pin-Worms . . . ugly parasites that medical experts say infest *one out of every three* persons examined. Entire families may be victims and not know it.

To get rid of Pin-Worms, these pests must not only be killed, but killed in the large intestine where they live and multiply. That's exactly what Jayne's P-W tablets do . . . and here's how they do it:

First—a scientific coating carries the tablets into the bowels before they dissolve. *Then*—Jayne's modern, medically-approved ingredient goes right to work—*kills* Pin-Worms quickly and easily.

Don't take chances with this dangerous, highly contagious condition. Get *genuine* Jayne's P-W Vermifuge . . . small, easy-to-take tablets . . . *special sizes* for children and adults. Perfected by Dr. D. Jayne & Son, specialists in worm remedies for 100 years.

Workday pointers

A LITTLE TIME spent watching the laying flock each day may help you spot disease or picking troubles before they get serious.

▼ ▼ ▼

ALFALFA MEAL may be the equivalent of green pasture, and it's available the year round.

▼ ▼ ▼

FRESH COWS that refuse to eat, act wobbly or cannot get up should be suspected of milk fever. Call a veterinarian without delay.

▼ ▼ ▼

SOUTHERN CATTLE moved north can stand northern winters better than northern cattle moved south can stand southern heat and insects.

▼ ▼ ▼

HAVE A COW that's subject to milk fever attacks? You might want to try the new preventive—feeding large amounts of vitamin D. It's a difficult treatment, however. And there's some guesswork in it. Large doses of vitamin D must be given from five to seven days before calving, but no longer. Continued feeding may be harmful to the cow.

▼ ▼ ▼

WET FEED is used to make hogs grow fast by H. F. S. Timm of Poweshiek county, Iowa. He uses a completely mixed ground feed and puts four gallons of water on five gallons of the ground and mixed feed.

▼ ▼ ▼

HOW MUCH CORN to fatten cattle? Long fed calves and yearlings will eat 50 to 60 bushels of corn during the fattening period. Short fed heavy cattle will often be finished on 40 to 50 bushels. Old rule is that a calf on full feed will eat one-fourth bushel of corn per day; yearling will eat one-third bushel; and a two-year old, one-half bushel. They'll run under this amount, however, rather than over.

WOOD CHIPS made good livestock bedding in Indiana trials.

▼ ▼ ▼

CLEAR SPAN CONSTRUCTION is best for farm buildings. Open interior without posts or supports is easier to work in and can be put to more different uses.

▼ ▼ ▼

BABY PIGS less than three weeks old should have some dried skim milk in their feed, says D. B. Huldman, Iowa State College animal husbandman. Milk sugar, which dried skim milk contains, was found to be the cause of improved growth from the feed.

▼ ▼ ▼

BABY'S PLAYTHINGS should not be painted at home. Paint used around the house is likely to contain lead which is poisonous. And babies are sure to chew on any plaything.

▼ ▼ ▼

GOT YOUR social security card? You'll need it before you make out your income tax papers in January or February of next year. Inquire at your postoffice for an application blank.

▼ ▼ ▼

FIRST DEFENSE against weeds is to buy seed that is free from them. Certified seed is field inspected, and is considered the safest buy. Other seed, however, can be weed-free. Check the analysis on the tag before you buy any kind.

▼ ▼ ▼

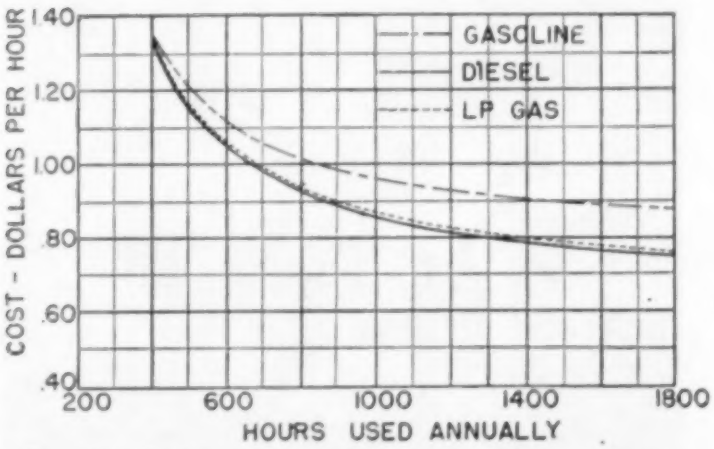
FAST DRIVING with modern tractors can be dangerous on roads and around barnyards.

▼ ▼ ▼

ROUGHAGE POOR QUALITY? Then feed more supplement per day to make up for lost protein and vitamin content.

▼ ▼ ▼

WHEN COWS have twins, milk production will be cut 1,000 pounds for that lactation and butterfat 50 pounds. Comparisons were made in South Dakota between lactation periods of the same cow before and after coming of twins.



Tractor costs per hour are shown here. Three-plow tractors using three kinds of fuel at 400 to 1,800 hours usage per year are compared. Note that Diesel and LP gas tractors show lowest costs. At 1,000 hours use per year, costs for gas tractors are about 97 cents per hour; LP gas tractors, 88 cents; and diesel, 86 cents. Costs are lower with more use, higher with less hours per year. Tests are reported by the Missouri experiment station and include all expenses except wages for driver.

"...practically overnight the scours seemed to STOP!"

Mr. Orville Gallington of West Terre Haute, Indiana, found that adding CSC's Penbac* to the regular feed saved his swine from severe scouring damage. His 60 pigs had gotten off to a good start. But one morning a few were scouring and soon 16 pigs were affected—two had to be killed. Mr. Gallington began using Penbac and "practically overnight the scours seemed to stop." In less than two weeks, he could see his pigs beginning to fill out.

CSC's Penbac is an antibiotic supplement containing bacitracin and penicillin. This combination of antibiotics used at high levels in swine feeding has proven effective in fighting infectious swine enteritis, stimulating appetites and reducing mortality. You save at least 30% over cost of competitive antibiotics. In addition, Penbac gives you the important *plus* of extra vitamins and unidentified growth factors.

Reading the Advertisements . .

—tells you what to buy and how to get most value for every penny spent. A dozen needs arise on your farm every week. Knowing which machine, which tools, which automobile, which suite of furniture, which cooking fuel is the best for the price you pay, will save money otherwise thrown away. Perhaps as little as twenty-five cents a week—perhaps a hundred dollars a single purchase.

Wallaces' Farmer and Iowa Homestead

LIKE THOUSANDS of other families the Vernon Paulsons of Greene county, Iowa, start Christmas with a service at church. Here they join the rest of the congregation in singing carols on Christmas Eve.

Night before Christmas

CHRISTMAS is a joyous time for families everywhere and for the Vernon Paulsons, of Greene county, it's the highlight of the whole year. With five children in the family, Douglas, 10; Darlowe, seven; Raejean, five; Roxie, two, and Tommy, two months, you just know there's plenty of Christmas cheer and excitement. And a lot of cookies and other treats to bake, too.

"The children get awfully excited about Santa and all the presents under the tree," says Mrs. Paulson, "but we stress the real meaning of Christmas, too." "We all go as a family to our church Christmas service and program," she emphasized.

The Paulsons are members of the Lutheran church in Dana. The church has an almost entirely rural congregation.

After the church service, the Paulson youngsters hurry home to hang up their stockings and set out refreshments for Santa Claus.—Joyce Bull.

ALL THE LITTLE FOLKS in the Paulson family take turns in church program. Here Raejean, speaks her piece.

LAST MINUTE before church, Mrs. Paulson puts the finishing touches on Roxie's hair. Raejean, Darlowe and Douglas line up for inspection.

AFTER CHURCH the children hang up their stockings. Douglas helps Roxie with hers.

Country air

LONG years ago I thought maybe I'd try to win my way to fortune by writing stories. An editor told me the kind in most demand by editors was holiday stories. It seems to be hard for authors to write new material on old themes. Well I never sold one—for that matter I never wrote a Christmas story. It seems to me the old ones still are best.

Driving home from the farm the other day in nostalgic mood I remembered the stories from childhood that have stayed by me through the years. There was the mystery of a starlit field, sheep and shepherds, a baby's cry, a manger, blinding light and angel's voices. That was always read at the Christmas programs at Bethel church. It is still the same mysterious story in Luke II.

There was that other story from Matthew II about the wise men and their camels and strange gifts. I always saw the events taking place in our own one-story barn at home—it's the barn I knew best—only they were horse stalls that we had—no cattle mangers. I was glad there was a broken board in front on the stalls so Mary and her Baby could see the shepherds and wise men more easily.

Then there was that rollicking story that strained my credulity. But why not believe it? It was so delightful. All about the night before Christmas and the jolly old chap in his nightcap who saw what I had always hoped to see. Think of it! Eight tiny reindeer and Santa too. It was about that time of my life when I began to wonder how Santa could come down our stove pipe without getting all black and maybe a little burned. But my big brother always knew the right answers to the puzzle.

I don't know when the Cratchitts became a very important part of Christmas. It was when I was grown up and reading aloud to my own small boys that the Cratchitts became more than just a poor family like the five little Peppers. Lionel Barrymore and the radio brought the whole of Dickens' Christmas Carol into our home year after year.

There were many years when Part I of Ben Hur and Van Dyke's "Other Wise Man" were a part and parcel of the Christmas season. The latest addition to my Christmas literature has been Menotti's opera "Amahl and the Night Visitors."

Thru radio and TV many slightly known Christmas carols have become familiar. From the time I was in college Handel's Messiah — not really Christmas music but sacred and beautiful—has been a part of my Christmas musical fare. Much beautiful nativity music that is too difficult for amateur voices has become well known thru radio records and TV.

"I'm Dreaming of a White Christmas," "Jingle Bells"—even "Santa Claus Is Coming to Town" and "Rudolph the Red Nosed Reindeer" are now a part of the season and will be magic tunes with a background of styrofoam, plastic ornaments and colored sequins to the younger generation. Now and then a new tune or story will be added that will live for years and be especially loved by children. Particularly if the stories are read from a dog-eared book in a beloved voice while in the shelter and security of parental arms.

How immeasurably richer our lives are for having read much. So much of our TV literature and drama had its basis in books that are connected with our formative years. What we lose from reading a story first hand we can never pick up from movies, radio and TV versions.

The other day at the farm I felt a warm glow of comfort for the livestock in the barns bedded deep in straw. Pens for the sows about to farrow were soft and clean with yellow straw. The calves would sleep soundly in the deeply bedded shed. I fell to thinking about the old legend of the animals talking at midnight on Christmas eve and kneeling in worship. Sometimes on the day before Christmas the man of the house used to say "Have to haul extra bedding this afternoon so the animals will have something soft to kneel on tonight."—Elizabeth C. Wherry.

WHEN COMPANY COMES . . .

It's Performance That Counts!

YOU CAN'T BEAT

PHILGAS®

for Roasting, Baking, Broiling and Top-of-the-Range Cooking!

"The proof of the pudding is in the eating." And the proof of a cooking fuel is in its performance! With Philgas you get complete *flexibility* . . . you can turn the flame up or down to the exact temperature you need . . . high, low, or any number of degrees of heat in between. You get instant heat, too. No waiting, no warm-up period. And when you turn Philgas off, it's off! No lingering heat to keep your kitchen sizzling. And kitchens stay spick-and-span with clean-burning Philgas. Because you broil with the door closed there's no smoke or soot to fog up walls and ceilings.

You might think this high quality fuel would be expensive, but it is not! Philgas costs little to install and it's economical to use. In fact, it's one of the thriftiest, as well as the most convenient and dependable of all fuels. With your Philgas supply in your back yard you are assured of uninterrupted service even during ice storms and high winds. See your Philgas Dealer and find out how little it costs to enjoy every advantage of automatic gas cooking, with Philgas.

Philgas is our name for high quality LP-Gas—Bottled Gas—Butane—Propane.

More ribbons for her treasure chest of prizes

Marshalltown Cook Wins Top Awards at 2 Different Iowa Fairs

Mrs. Fred Benson cannot even begin to guess how many cooking prizes she's won in her lifetime. This year she entered both the Central Iowa Fair and State Fair, and carried off top honors at both.

Mrs. Benson loves to improve on the recipes she uses. She believes that a last-minute change, an added touch of this or that will sometimes turn the prize-winning trick. But whatever else she might change, Mrs. Benson always uses Fleischmann's Active Dry Yeast. "It's the easiest yeast ever," she says. "And always rises in a hurry."

Now that the holiday season is here your family will appreciate yeast-raised specialties even more! And it's so much more convenient to serve these specialties if you have Fleischmann's Active Dry Yeast on hand. That's the dry yeast that keeps for months in your cupboard. And it's so easy to use, always rises fast. If you bake at home get Fleischmann's Active Dry Yeast. It's the best—the yeast prize-winning cooks prefer.

Cookery corner

Plum Pudding

- 2 cups sifted flour
- ¼ cup sugar
- 1 teaspoon salt
- 1 teaspoon soda
- 1 teaspoon cinnamon
- 1 teaspoon ginger
- 1 teaspoon mace
- ½ cup butter
- 2 eggs, beaten
- ¾ cup mild molasses
- ¼ cup milk
- 1 cup sliced citron
- 1 cup glazed pineapple
- 2 cups chopped dates
- 1 cup seedless raisins

Sift the first seven ingredients together. Add the melted butter, eggs, molasses and milk. Mix well. Stir in fruit. Fill a well greased, lightly floured 1½ quart mold about two-thirds full with batter. Cover with a tight fitting lid or with aulminum foil tied tightly. Steam three hours in a large kettle with enough boiling water to come halfway up the side of the mold. Count time after water begins to boil. Serve with a Foamy Sauce.

FOAMY SAUCE: Soften one-half cup butter. Gradually blend in one cup of confectioners' sugar. Add a dash of salt, and the yolk of one egg. Place over hot water, not boiling, and cook until light and fluffy, about seven minutes. Remove from heat and stir in one-fourth teaspoon nutmeg. Fold in egg white that has been beaten until it stands in peaks. If desired, fold in one-half cup whipped cream.

Cranberry Salad

- 1 package cherry flavored gelatin
- 1 cup hot water
- ¾ cup sugar
- 1 tablespoon lemon juice
- 1 cup pineapple juice
- 1 cup raw ground cranberries
- 1 orange ground fine
- 1 cup drained crushed pineapple
- 1 cup chopped celery
- ½ cup chopped pecans

Dissolve gelatin in hot water, add sugar, lemon juice and pineapple juice. Stir to dissolve. Chill until practically set, add remaining ingredients. Pour into individual molds. Unmold on lettuce and garnish with mayonnaise.

Christmas Bread

- 1 cup scalded milk
- ¼ cup butter
- ¼ cup sugar
- 1 teaspoon salt
- ½ teaspoon nutmeg
- ½ teaspoon mace
- ¼ teaspoon cloves
- ½ cup warm water (110-115 degrees)
- 2 packages yeast
- 5 to 5½ cups sifted flour
- 1 egg
- ½ cup raisins
- ½ cup cut-up candied cherries
- ¼ cup chopped nuts

Prepare fruits and nuts to add to the last of the mixing period. Scald the milk and pour into a large bowl with butter, sugar, salt and spices. Stir to dissolve. Add yeast to the warm water in a small bowl. Let stand a few minutes. When milk mixture has cooled to lukewarm, add half the flour, the egg and then the dissolved yeast. Beat until smooth.

Add half the remaining flour, mixing well. Then blend in the cut-up fruits and nuts with more flour until the sides of the bowl are cleaned. This will be a medium soft dough. Turn out on a floured board, knead gently until smooth. Place in greased bowl, turn once to grease the top.

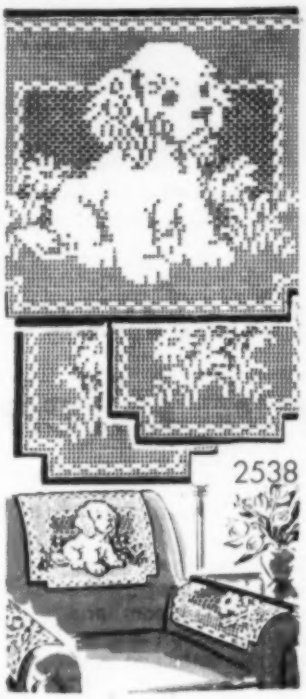
Let rise in warm place until doubled in bulk. This will take about an hour. Turn out on lightly floured board and divide in two parts. Shape each half into a loaf and place in well greased loaf pans. Let rise in warm place until dough reaches about one-fourth inch from tops of pans. Brush tops with melted butter, sprinkle lightly with white sugar. Place in pre-heated 375 degree oven and bake until sides and tops are well browned.

PLUM PUDDING is a wonderful dessert all during the winter but it's a "must" for Christmas. You'll find the recipe below.

Hand work for winter evenings

No. 5367. This pretty scalloped apron with lovely blue flower stamp-ons will be yours in a jiffy—it's so easy to make. Color transfer for 15 motifs included.

No. 2538. An appealing filet set to perk-up your favorite chair.



No. 5187. Perk-up your kitchen with a set of these embroidered towels. You'll find them easy to transfer and quick to embroider.

No. 5111. Beautiful crocheted flowers are set in a background of simple embroidery to form eye-catching handkerchiefs.

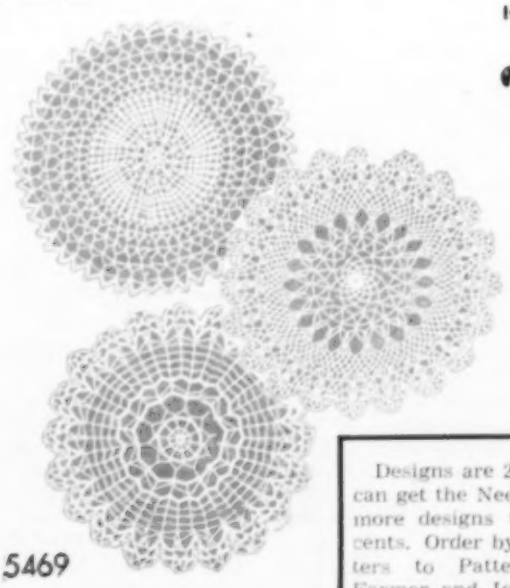
No. 2536. Here is an attractive cloche that is a "must" for winter wardrobe of mother and daughter, big 'n little sisters.

No. 2593. Lovable bear potholders, made from workbasket scraps, are handy and lend a gay note to any kitchen.

No. 5469. A trio of Winter Snowflakes to add a touch of white frosting to your table-tops! Each measures eight inches in diameter.

No. 5538. Just iron off these cute knittin' kittens to trim linens and wearables. The colors—brown, coral and turquoise.

No. 2405. You'll spend pleasant needlework moments embroidering these cheerful morning-glories in vibrant colors.



No. 2516. A simple frock to sew for the two, three or four-year-old miss! Make it from a sheer fabric, add the embroidered yoke, and she'll have a pretty party frock.

Designs are 25 cents, coin preferred. You can get the Needlework Album with dozens more designs to knit and crochet for 30 cents. Order by number. Address your letters to Pattern Department, Wallaces' Farmer and Iowa Homestead, 1912 Grand Ave., Des Moines, Iowa.

Easy to sew

No. 8725. For the slightly shorter woman a simple, tailored classic with choice of sleeves. Sizes 14½, 16½, 18½, 20½, 22½, 24½. Size 16½, cap sleeve, 4⅝ yards of 35-inch.

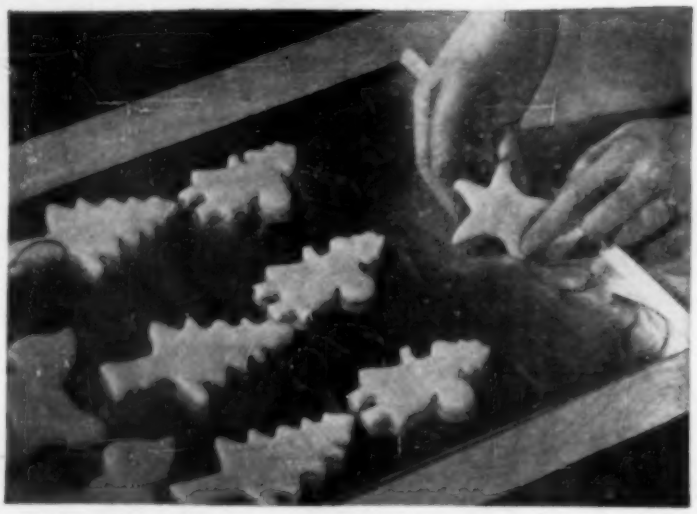
No. 1454. Teens adore the new long torso frock. Sizes 10, 12, 14, 16. Size 12, 5½ yards of 35-inch.

No. 8319. A complete set of clothes to give her doll a fresh look. Easy and fun to sew. For dolls 14, 16, 18, 20, 22, 24 inches.

No. 8309. Tie-on aprons make wonderful gifts. Sizes 12, 14, 16, 18, 20; 40, 42. Size 14, top apron, 1 yard of 35-inch; ½ yard contrast; center apron, 1 yard of 35-inch; lower apron, 1⅛ yards of 35-inch; ⅝ yard contrast.

No. 8326. Button front jumper in large sizes, with blouse included. Sizes 36, 38, 40, 42, 44, 46, 48, 50, 52. Size 38, jumper 3⅝ yards of 35-inch; blouse, short sleeves, 2½ yards.

Patterns are 30 cents each, coin preferred. Order by number from Pattern Department, Wallaces' Farmer and Iowa Homestead, 1912 Grand Ave., Des Moines, Iowa.



LOOPS of clean string can be baked into cookies. These loops make it easy to hang cookies on your Christmas tree.

Gifts from the farm kitchen

Farm family enjoys making Christmas cookies for friends and relatives

OUR Christmas tree stands proud and glistening by the front window. The floors and windows have been polished until they shine. Wreaths and stars look out the side windows, but the heart of holiday festivities is still the kitchen!

Mom carefully wraps cookies and little tarts in their protective foil. Susan tucks them into holly-covered boxes and red painted cans that she has decorated. Junior is popping corn to tuck in empty corners.

The yellow and blue and pink cookies frosted by the children will go to Grandpa, who will admire the bright colors and overlook a few smeary edges.

Boxes of mixed candies are packed for the neighbors' children, the Sunday School teachers, and the friendly bus driver.

Sharing and working together gives us the true spirit of Christmas, and what better way can we find that joy than preparing and sharing our favorite family recipes?

CHRISTMAS TREE COOKIES

(For hanging on the Christmas tree.)

1 egg
⅓ cup sugar
⅔ cup honey
2½ cups sifted flour
1 teaspoon soda
1 teaspoon salt
½ cup butter
1 teaspoon vanilla

Beat egg, blend in sugar, honey, vanilla and melted butter. Sift flour, soda, salt and stir into the sugar mixture. Mix well and put into refrigerator to chill for a couple of hours.

Roll dough to one-fourth inch on floured board or cloth. Cut into shapes. On a greased cookie sheet, place loops of clean string. Place cookie on joining of loop, press down lightly. String will bake into cookie for hanging. Bake 10 minutes at 375 degrees or until a delicate brown.

ICING FOR COOKIES

4 tablespoons cream
2 cups confectioner's sugar, sifted
1 teaspoon vanilla
Coloring and decorations

Stir enough cream into sugar to make an easy spreading mixture. Add flavoring and mix well. For Christmas tree cookies, add a few drops of green food color. For stars, use yellow, etc. Use silver shot, colored sugar, colored coconut to make gay decorations.

CHOCOLATE PEAKS

½ cup shortening
1 cup brown sugar
1 teaspoon vanilla
2 beaten eggs
3 squares chocolate, melted
2 cups sifted flour
2 teaspoons baking powder
½ teaspoon salt
½ cup milk
¾ cup chopped nutmeats
Nut halves for decorating

Cream shortening, sugar and vanilla until light and creamy. Stir in eggs and melted chocolate.

Sift dry ingredients and add alternately with milk. Add chopped nuts. Drop by teaspoonful on greased cookie sheet. Top with half nutmeat. Bake 10 to 15 minutes in moderate oven, 350 degrees.

CHERRY TARTS

1 double recipe pastry
2 cups sour pitted cherries, drained
1 cup sugar
2 tablespoons flour
⅛ teaspoon nutmeg
1 tablespoon butter, cut into bits

Roll pie crust one-eighth thick; cut into six-inch circles.

Combine other ingredients in bowl, mixing well so cherries are covered. Place a generous spoonful of cherry mixture on half of each circle. Fold over and press edges with fork. Puncture top of tart with fork. Dust tops with sugar. Bake in hot oven—about 400 degrees—for about 25 minutes until the tops are a pretty brown.—Helena Davidson, Minnesota.

Save almost ten pigs per sow

Hog raisers' progress shown by Master Swine Producers records

TWENTY-FIVE record-keeping hog raisers averaged 9.88 pigs per sow in 1955. Average daily gain, birth to market weight, was 1.14 pounds.

Average age at which hogs were sold was 186 days, just a little over six months. Average weight of market hogs was 212 pounds.

These 25 men were named as the 1955 class of Iowa Master Swine Producers. This is the 14th year in which 25 Iowa men have been recognized for hog raising accomplishments.

Table showing the individual records of the 25 men appears below. Last three lines show comparison with the records of other Master Swine Producers back to 1942.

What do these records mean for hog raisers? They show (1) what can be accomplished in pigs saved per litter and gain per day, and (2) trend of hog raisers' progress in the last 14 years.

How do these men raise almost 10 pigs per litter and make market hogs in six months?

Mostly it's just by following modern, well-known management practices. They include sanitation, modern equipment and good care at farrowing time, selection for good breeding, and use of modern, balanced and fortified feeds.

Any hog raiser with reasonably good equipment can equal these records in his best years. They are attainable goals for the average farmer.

At what point have hog raisers shown most progress in recent years? The recognition contest answers that question pretty clearly.

Litter size is improving more than anything else.

For the first eight years of the Master Swine Producers' contest (1942-1949), litters averaged 8.34 pigs. This year's average topped that by about one and one-half pigs per sow. Thus a remarkable gain in litter size is shown.

Daily gains, however, have increased only slightly. For 1955, gain averaged 1.14 pounds per day, birth to market. That's below the 1.18 average of the five years before and also below the 1.15 average of the first eight years of the contests.

Why aren't gains per day increasing faster? The hot summer might have been responsible for this year's low record, says E. L. Quaife of Iowa State College. There might be other reasons for the long-time trend.

When litter size goes up, as it has, the sow has more pigs to suckle and less milk per pig. And bigger litters means more of the weaker pigs saved. They can be expected to gain more slowly.

Still another reason for lack of progress in growth rate is the fact that farmers are selling hogs lighter. Big hogs make fastest gains.

This year's average market weight was 212 pounds. Average weight at market time has gone down steadily since the first years of the contest when the average was 227 pounds.

Hog records to shoot at

Records of the 25 men in the 14th class of Iowa Master Swine Producers are shown here. Columns of figures show number of sows kept, pigs raised per sow, average market weight and average gain per day. The annual event is sponsored by Radio Station WHO, Iowa State College, and the Iowa Swine Producers Association. WHO honored the men at a December 10 dinner in Des Moines. Swine Producers gave awards.

Year end brings tax questions

Is your corn check 1956 income if you pick it up after January 1?

END of the year brings some special income tax problems. Here are some answers to farmers inquiries:

QUESTION: You deliver corn to the buyer before January 1, but you don't get the check until next year. In what year should the income be reported?

ANSWER: If agreement is completed this year, and all you have to do is pick up the check, you're supposed to report the money in 1955 income. But if any matter of price or grade is not determined before January 1, then the money should be reported in 1956 income. That applies to cash basis farmers only.

Q.: Suppose you sold a farm this year and got a down payment. The deal is to be completed next March 1. When should the down payment be reported?

A.: Down payment is not to be reported this year. It's a part of the sale price for the farm and is considered in figuring the profit. Profit on the deal, in this case, would be reported on Schedule D in your 1956 income.

Q.: You built a new corn crib in September. Cost was $3,000. How much depreciation can be charged off for this year? How much next year?

A.: This type of building gets special treatment. You can charge off the whole cost in 60 months. That's $50 per month. So if the building was completed October 1, you can charge off $150 in the income tax return for this year. For 1956, you can charge off $600.

Q.: Do cash basis taxpayers always save taxes by paying bills before January 1, and delaying income receipts until after January 1?

A.: Tax payments are delayed. But tax saving is not automatic. If the procedure levels out your income one year with another, there may be tax saving. If it forces more than average income into the next year, tax losses might result. The tax effect of shifting sales around January 1 has been much over-estimated by taxpayers in lower brackets.

Q.: Why can't accrual basis taxpayers shift income by making deals before or after January 1?

A.: Suppose an accrual basis taxpayer has 1,000 bushels of corn for sale. If the corn is on hand January 1, it's in the inventory. If sold, it appears in the sales column. In either case, it adds to income. So income is not affected by time of sale.

Q.: You began farming last March 1. Must you use the calendar year? Or can you use the fiscal year beginning March 1?

A.: You can use either one. But when you choose one, you will have to stick to it until you get permission from tax officials to change. Some farmers see advantages to the fiscal year beginning March 1.

More questions of this kind are answered in the farm account and income tax information book described below.

Farmers Tax Saver

is both account book and income tax help.

Jack Miller is author of the "Farmers Tax Saver." Mr. Miller is a member of the Iowa legislature and wrote the simplified Iowa state income tax law now in force. He is a recognized authority on income tax law and is a former chairman of the American Bar Association's committee on tax problems of farmers.

HOW FARMERS TAX SAVER CAN HELP

1. **Provides 22 pages for writing down receipts and expenses; 40 pages of income tax explanations.**
2. **Explains Social Security as it applies to farmers.**
3. **Provides depreciation schedules, tax tables, etc.**

See no let-up in farm squeeze

Hickenlooper backs sow buying plan as economists forecast lower prices

WHAT a change one year can make in the farm outlook! And in what people will propose.

Last fall, the U. S. Department of Agriculture in its annual outlook meeting was only mildly pessimistic about farm prices. It was recognized that farm income might not keep up with business improvement, but then it might not really lag far behind either. With the flexible farm price law on the books, friends of the Eisenhower administration anticipated less worry over agriculture.

Week before last at Washington, the economists took another look ahead. What they saw was not very cheering for farmers, and it gave some administration supporters the fits.

With almost startling suddenness, Iowa's Sen. Bourke Hickenlooper came out for a sow-and-gilt buying program. Senator Homer Capehart of Indiana plunked for a gigantic international Community Chest to give away our surpluses. Young Republican committes in Minnesota and Wisconsin recommended production (alias Brannan plan) payments direct to producers.

And Secretary Benson was even reported as looking at a scheme to hold down government benefits to large producers so as to protect the competitive position of small producers.

Continued squeeze

Just what did the economists see for 1956? In brief, they saw no let-up in the cost-price squeeze on agriculture. Production expenses, they said, are not likely to go down much. Feed costs may be considerably lower, mostly because the farmer's own grains are lower, but these things will be offset by higher costs of manufactured goods. And the middleman's cut is likely to average higher—repeat, higher—in 1956 than in 1955.

All this probably will be accompanied by a further drop in cash receipts from farm marketings. The end result is clear. Farm income can go only one direction; down.

How much drop?

How far down? The outlook speakers didn't venture any specific figures, but it is understood they regard a further fall of five percent as likely. If this proves to be the case, farmers next year will wind up being 35 percent below their 1951 income level.

Non-farm income, meanwhile is expected to reach record heights. City people may not spend as much for cars and housing, but they will have more for other things.

But what about changes in the farm program that may be made in the coming session of Congress? F. V. Waugh, speaking for the Department, said:

"Such changes could affect the long-term outlook very substantially. But I doubt if they would affect the 1956 outlook very decisively. No adjustments in the farm programs are likely to make an immediate change in the basic economic facts confronting the farmer. It took several years for American agriculture to get into its present troubles. Economists and statesmen can help to get it out, but it will take time to do it."

Incidentally, the aforementioned forecast of a five percent slump was based partly on the assumption that the recent upward trend in hog numbers will be reversed or at least flattened out. If it is not, then 1956 farm prices will be further weakened.

Bankers change views

Bankers specializing in farm credit also met recently in Chicago to discuss the farm outlook.

A year ago, they, like Secretaries Benson and Morse, thought that the good, efficient farmers would keep right on doing well, that only the weak farmers might have trouble. Today, they report, even some of the strongest producers are feeling the pinch.

One of the speakers at the bankers' meeting argued for a longer term on production loans, say up to seven years. This idea was well received, but inwardly more than one banker realized what really is needed is more farm income.

Cabinet at work

Then on Dec. 3, the President's cabinet, with Vice-President Nixon presiding, reportedly spent over three hours on the farm problem. The idea was to prepare something definite for consideration when President Eisenhower meets with party and Congressional leaders on Dec. 12-13.

Corridor gossip has it that some of Benson's cabinet colleagues regard even his sharply revised ideas as too pinch-penny for the rapidly worsening situation.

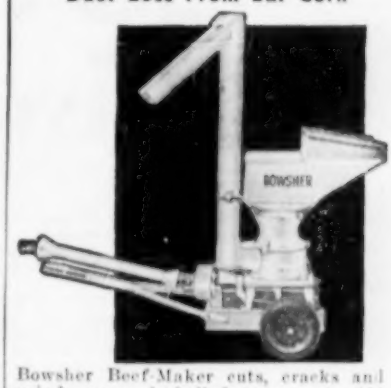
On Dec. 15, the President's Agricultural Advisory Commission will go over any proposals finally drawn up by Benson.

It is now thought that the conservation acreage reserve or "soil bank" plan will certainly be included.

Both Benson and the National Grange have heretofore been favoring rather a liberal expansion of the present ACP program than a separate rental scheme. But Benson lately has shifted so far that sideliners would hardly be surprised if he now agreed to direct production payments on commodities other than wool.

Bowsher Burr Mill No-Dust Grinding Saves $450 A Year

Eliminates 10c A Bushel Dust Loss From Ear Corn



Bowsher Beef-Maker cuts, cracks and grinds ear and shelled corn up to 300 bu. an hour. Two sets of knives and large surface cone-shaped burrs give even granular feed without dust. LIVESTOCK NEWS

The **International Hereford** sale held the evening of Nov. 29 in the International Sales pavilion presented a fine offering that sold for prices that will make good investments for their new owners.

16 bulls averaged $454
22 females averaged $474
38 head averaged $466

Top of the sale was lot 28, NB Princess 10th entered by McCormick Farms, Medina, Ohio. She sold for $1,500 to Crystal Lake Farm, Granger, Ohio. H. C. Jefferson, Skyesville, Md., sold the second top, lot 35, RF Blocky Alpinia 2d, for $1,000. Her buyer was M. P. Hereford Farm, Casonvinna, N. Y. The same consignor entered the top bull, lot 24, R. F. Super Alpine 2d, who sold for $1,000 to C. R. Kortie, Lebabon, Conn.

Second top was an added entry bull calf from Honey Creek Ranch, Grove, Okla. He sold for $740 to Marvin L. Mohr, Wellman, Iowa. The sale was under the management of the American Hereford Association.

The **International "Show Window" Angus** sale at Chicago, Ill., Nov. 28, presented a richly-bred offering of excellent cattle from good reliable breeders.

10 bulls averaged $1,190
40 females averaged $1,111
50 lots averaged $1,127

The top of the sale was Fannie Bess of Denmor 14th from the Paul Dennis farm and sold for $5,300 to Ferndale Ranch, Santa Paula, Calif. Erianna 7th of Shadow Isle from the Canadian herd of D. B. Weldon went for $2,650 to B. C. Cotton, Dry Ridge, Ky. Fannie Bess of Walnut 7th from Model Farms, sold for $2,500 to Lakewood Farms, Mukwonago, Wis. Queen 379th of Hill Crest, a J. H. Quisenberry entry, sold for $2,000 to John Fischer and Wilton Farms, Davenport, Iowa.

The top bull, Highlands Bandolier 85th, consigned by E. H. Heckett, sold for $3,000 to Stoney Crest Farm, Oxford, Conn. Gallaghers Prince Eric 6th, a Gallagher entry, went at $2,100 to John Hyatt, Hood, Va. Auctioneers were Roy Johnson, Hamilton James and Paul Good.

Raymond E. Meyer, 50, Russell, Iowa, prominent Hereford breeder, was killed instantly by a tractor accident on Nov. 15. He was born April 9, 1905, near Lafayette, Ind., and moved to Lucas county, Iowa, in 1922. He is survived by his wife and three sons. His choice herd of Herefords will be sold Jan. 6 at Chariton, Iowa.

Howard Schnell Dies

Mr. Schnell, Dickinson, No. Dak., and two other men were killed in a private plane near Rapid City, So. Dak., Dec. 1. He was a leading purebred livestock auctioneer. His passing is a distinct loss to the livestock fraternity and we extend our sympathy to his family.

These was standing room only at the **F. J. Bickel & Sons Hereford** dispersion sale at Lineville, Iowa, Nov. 28. Many leading Hereford breeders from a wide area packed the sale tent and demand thruout the auction was strong. Averages were as follows:

9 bulls averaged $785
97 females averaged $256
106 lots averaged $301

M. Zato Heir 79th, an April '54 son of TR Zato Heir 27th, was one of the featured service sires, and went on to become the top selling bull at $3,000, the bid of Ralph Harris, Kansas City, Mo., and Bianchi and Sanford, Macon, Mo. Russ Wilson & Son and Davis and Burns, all of Gallatin, Mo., paid $2,200 for M. Zato Heir M2d, a December '53 son of Tr Zato Heir M.

TH Starla 169th, a 1947 daughter of WHR Ruling Star 43d, and her heifer calf by AP Prince P 516th, topped the females at $520. C. B. Robinson, Princeton, Mo., paid $185 for the calf, and Max Schomberg, Letts, Iowa, took the cow at $335. Bell Blanchard 10th, an eight-year-old daughter of Super Lad 4th with heifer calf at side brought $515. Marvin Perkins, Corydon, Iowa, took home the calf at $125, and Stanley Koep, Belle Plaine, Iowa, paid $390 for the cow.

Col. Freddie Chandler cried the sale.

New Angus President

Otto G. Nobis, Davenport, Iowa, Angus breeder, was elected president of the American Aberdeen-Angus Breeders Association at that group's annual meeting at Chicago.

Elliot Brown, Rose Hill, Iowa, was elected to the board of directors. Other directors from the midwest include Don C. Pollock, Unionville, Mo.; Lewis B. Pierce, Creston, Ill.; Duane Clark, Worthing, So. Dak.; Ralph L. Smith, Chillicothe, Mo., and W. J. Kuhfuss, Mackinaw, Ill.

You can stamp out brucellosis in your swine herd if you have your own animals blood-tested and buy only brucellosis-free replacements.

IOWA HEREFORD ASSOCIATION SHOW and SALE

HARLEY AND GRAMPS—Send him back for a loan, Hilda!

RAYMOND E. MEYER ESTATE
HEREFORD DISPERSION!

FRIDAY, JAN. 6th

Sale at 12:30 P.M. Lunch available. To be held at the Chariton Sale Pavilion on Highway 14, 1½ miles north of

CHARITON, IOWA

Due to the recent death of Raymond E. Meyer, the entire herd of Registered Herefords will be offered at Public Auction

83 HEAD — — 62 LOTS

10 BULLS

2 Herd Bulls — 4 Serviceable Age Bulls — 4 Yearling Bulls

52 FEMALES

21 Cows with calves at side, and many of them rebred. A number of these will be old enough to sell separate from dams.

19 Bred Cows — 7 Bred Heifers — 5 Open Heifers

Featured will be the Get, Service and Sale of the following Top Herd Sires:

REGALITY WHR TRIUMPH

A six-year-old son of WHR Regality 24th from a Real Prince Domino bred dam. This top breeding sire was purchased when six months old for $1,500. He is very strong headed, heavy boned, typey, and he passes these characteristics on to his get.

WHR HELMSMAN REIGN

A Sept. '52 son of WHR Sovereign 2d from a granddaughter of WHR Proud Princeps 9th. A heavy boned bull of correct type. Most of the daughters of "Regality" will carry his service.

Nearly all of the cows are of good ages, 75% or more of them being six-year-olds or younger. They are mostly of light mellow color so popular among top breeders, and have plenty of bone. They represent years of constructive breeding, and carry bloodlines of national reputation. Many of the most sought after bloodlines will be represented, including: STAR DOMINO 6th, H & D TONE LAD, HT ROYAL RUPERT, WHR PROUD MIXER, and WHR ROYAL DUKE. Offering tested for TB and Bangs within 30 days of sale. Send now for your FREE catalog. Please mention this publication. Address

JO Royal Lad 56th	by	Royal Tredway 8th

THIS IS A FORCED REDUCTION SALE

Since our good crop land and winter quarters are covered by water of the Gavins Point Reservoir, we are forced to hold this reduction sale.

Buy proven bloodlines from a herd that has been breeding Hereford cattle for 40 years. Much of this offering would never sell if we were not forced to reduce our operations. The two-year-old heifers and heifer calves have been vaccinated for Bangs, and the bulls and cows have been tested for TB and Bangs. Send now for your FREE catalog. Please mention this publication. St. Joe Registered Angus Sale

Mon., Jan. 9, 1956

In the St. Joseph Livestock Sale Pavilion in the Stock Yards

St. Joseph, Missouri

Sale starts 9:00 A.M.

185 Bulls 40 Females

From 80 Leading Herds of Missouri's 3,000 Registered Angus Breeding Establishments

BULLS just the right age to turn out next spring—None under 16 months of age at sale time—All under 3 years—Mostly 17 to 25 months old. In the main, the bulls assembled for your appraisal will be the rugged, beefy, masculine kind suitable for the rancher or farmer who is producing top commercial cattle or who has a registered herd. They will be in good flesh, but not too fat to keep them from being active on the job. Whatever your bull needs are, you should find what you want at this sale.

FEMALES will be of top quality and preferred breeding, and presented in fitted condition—open and bred heifers.

41 Bulls 13 Females

This prominent regional event with a record of 15 successful sales presents another outstanding selected offering.

HERE YOU WILL FIND THE MOST OUTSTANDING AND RICHLY BRED GROUP OF SHORTHORN HERD BULLS THAT HAVE EVER BEEN OFFERED IN A TRI-STATE SALE WHICH HAS A LONG RECORD OF SELLING ONLY TOP BULLS.

41 BULLS that are ready for service
13 FEMALES bred and some with calves

An indication of the breeding and quality of this offering is as follows: 14 lots are sired by outstanding Imported bulls. 20 lots are sired by bulls that were champions in the strongest shows in their own right. In addition, others were sired by outstanding sale tops. A good share of this offering have won show honors. A 1955 **American Royal** prize winning bull is included. Tri-State is where you will find only the best. Buyers from many states annually buy their proven seed stock here. Always something new for old customers.

Livestock News

International Congress **Shorthorn** sale, Chicago, Ill., Nov. 28, presented a richly-bred offering of desirable cattle with the following results:

25 bulls averaged $1,043
25 females averaged $833
50 lots averaged $938

The champion bull of the sale, Susanna Custodian from the S. J. O'Bryan herd, sold for $1,850 to Nelson Farms, Geneseo, Ill. Reserve champion, a Ringwell entry, Ringwell Masterstroke "by Beaufort Bulldozer, sold for $2,200 to Home Again Farm, Franklin, Va. The top bull was Scotsdale Juggernaut from the S. G. Bennett farm and went at $3,150 to K. S. Adams, Bartelsville, Okla. H. A. Kraft, Correll, Minn., paid $2,675 for Deep Cove Scottish Monarch, from the Acadia Farms. Calvin L. Olson, Newell, Iowa, selected Marmac Capstone from the Marion Mackey herd at $1,250. Westmere Elect, an attractive roan son of Morphie Elect, was the favorite of many. He was consigned by Kenneth Kettenhofen and purchased by C. E. Stewart & Sons, Rose Hill, Iowa at $1,000. The champion female of the sale, Dunrei Rosebud 4th, consigned by Harvey Hoewischer & Son, sold for $1,000 to Mr. Nash, Warrenton, Va. Reserve champion from the Kettenhofen farm and a daughter of Morphie Elect went at $2,700 to John Alexander & Sons, Aurora, Ill. The top female, Scotsdale Scottish Buttercup from the Bennett herd sold for $4,050 to Anthony Pitkus, Capron, Ill. George Struve & Sons, Manning, Iowa, selected Fontana Augusta 2d from the herd of Joseph Zuro and paid $1,000. There were 38 bulls sold for an average of $800 and 34 females at $695, and the 72 lots made $750 each. Auctioneers were J. E. Halsey and C. D. Swaffar.

The third annual **Hereford** calf sale, Story City, Iowa, Nov. 26, under the able management of Leon Joy, brought out a very good attendance. The top steer calf from Fincham Bros., Ames, Iowa, sold for $180 to Les Meecham, Clarion, Iowa. They also had the top heifer calf which sold for $180 to Les Meecham. A choice steer calf from Orlin Lein, Kelley, Iowa, sold for $165 to Cecil Hill, Rowan, Iowa. The 23 steer calves averaged $131.50, the nine heifer calves averaged $101 each. All went to Iowa buyers. Auctioneer was L. Joy.

A capacity crowd of **Hereford** breeders, mostly from Missouri, Iowa, and Illinois, crowded the ringside at the J. W. Dunn & Son Hereford sale at the farm near Baring, Mo., Nov. 22. Bidding was spirited, and averages on the offering, nearly all bull calves and open heifers, were as follows:

27 bulls averaged $209
53 females averaged $164
80 head averaged $180

Ralph Jenkins, Wyaconda, Mo., paid $410 for the top selling bull, D Crusty 14th, an April '55 son of CK Crusty 131st. D. Princepts 21st, an April '54 son of CL Princeps 14th, brought $405, the bid of Paul Ringhausen, Hamburg, Ill.

Top on females was $350 paid for Belle Triumph 2d, a daughter of Worthy Triumph with a heifer calf at side by Missouri Helmsmen 2d. Pat Marra, Baring, Mo., paid $175 for the calf, and Wagler Hereford Farm, Pulaski, Iowa, took the cow at $175. E. G. Skinner, Jr., Unionville, Mo., paid $270 for Lady Helmsman A 2d, a bred daughter of Missouri Helmsman 2d.

Col. Gene Watson cried the sale.

The **International Polled Shorthorn** sale, Chicago, Nov. 30, was very successful with the following results:

12 bulls averaged $750
14 females averaged $551
26 lots averaged $641

The top bulls, TPS Coronet Commander 4th, a Lewis Thieman entry, sold for $2,425 to Maple Cattle Breeders Assn., Maple, Ont., Canada. Lynnwood Rothes Queen 3rd was top female at $1,075, going to Home Again Farm, Franklin, Va. There was only 26 head sold.

Of folks and farming

By Chuck Worcester, Farm Service Director, WMT & WMT-TV

STOCK TANK TROUBLES in the wintertime can be most aggravating. On one of the coldest nights recently the stock wiggled the shutoff float loose and in the morning we had the fanciest skating pond you ever saw for a cattle yard. The new tank heater works like a whiz, though . . . . certainly beats chopping ice all winter.

BREEDING GILTS separated from barrows and put on a breeding ration by the time they reach 150 pounds will farrow bigger and healthier litters. Producers who have tried it say they average 2 to 3 more pigs marketed per litter than when gilts are left on a fattening ration too long. Kent nutritionists suggest this pre-breeding ration for gilts: 500 lbs. ground corn; 800 lbs. ground oats; 400 lbs. good alfalfa meal; 300 lbs. KENT 35% Pig and Sow Concentrate.

THE VET CAME the other day to dehorn Pete's 4-H calves and we got to chuckling over an experience with a lame steer last summer. I had rigged a makeshift lasso out of about 20 feet of half-inch rope and chased the poor critter around the pasture for 30 minutes without success. When Doc "Cowboy" Strader got there he uncoiled his own rope, stood back 25 feet and let fly. Got him the first try. Modest Doc said it was just luck. He looked like an expert to me.

CATTLE FEEDERS will be interested in a report compiled from college tests. It shows the cost of each 100 lbs. of gain on calves, yearlings and 2-year-olds as they are fed to market weight. Costs vary from extremes of $13 to $48 per hundred! The report also shows the seasonal changes of slaughter cattle prices for the different grades. You can get a free copy by writing to me in care of Kent Feeds, Muscatine. Ask for the report "Cost of Beef Gains." Might save you a lot of money in years to come.

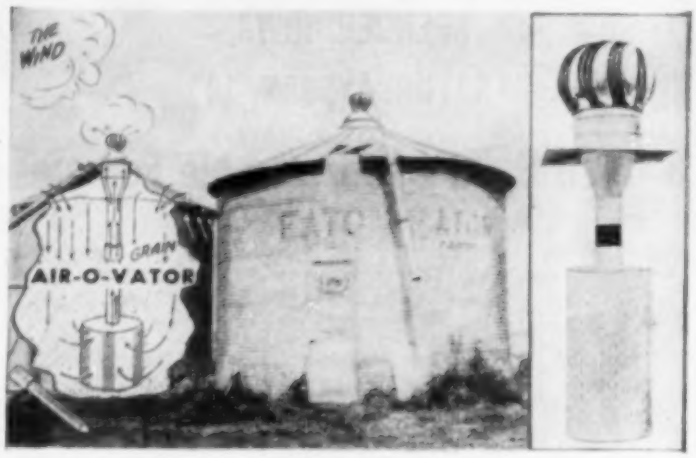
THE THREE OLDER BOYS at our house are far ahead of the rest of the family on Christmas plans. They've been studying the catalog and browsing the stores every chance they get. And the little ones catch the spirit of the season quicker than you'd think. While the rest of us talk about Christmas, Rickie and Julie have taken to calling it "Santa Claus Time."

KENT WINNERS at the International this year included the Grand Champion of the Junior and Open Shows . . . . Nancy Turner of Champion, Illinois. Last year's Grand Champion was Kent-fed, too. Kent feeders won 20 out of the 45 top places in the Junior Show, 3 of the top 5 steers shown by independent feeders in the Open Show, 6 of the top 12 swine carlots, and had a first, 2 seconds and a third place in the cattle carlots. Quite a record when you consider that the feeds used by commercial feeders are the same feeds that produced all these champions!

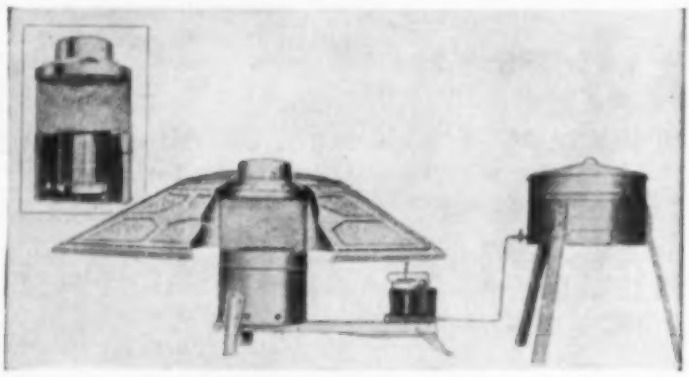
LEO AND HIS PIONEERS feature the neatest trumpet team you'll hear in these parts . . . . Dick Harvey and Bobby Andrews. Bobby's been hiding behind dark glasses for several weeks recuperating from an eye infection. Watch the gang weekly on: WHO-TV, Des Moines, Monday, 12:00 noon; WMT-TV, Cedar Rapids, Wednesday, 6:30 p. m.; WOC-TV, Davenport, Monday, 12:15 p. m.; WEEK-TV, Peoria, Saturday, 6:15 p. m.; KGLO-TV, Mason City, Monday, 9:30 p. m. and hear them on WMT radio Tuesday, Thursday and Saturday, 5:45 a. m.

KENT FEEDS, Muscatine, Iowa—Sioux City, Iowa

For further information about any of the products shown here, write to Wallaces' Farmer and Iowa Homestead, Des Moines, Iowa.



Air-O-Vator moves air thru grain with nature's power. Spinner head and temperature differentials do the job. Grain is both cooled and dried, say the manufacturer. Can be installed on any type grain bin. Made by Air-O-Vator Company.



Brooder is said to need no flue pipe. It can be operated with or without the 54-inch hover. Capacity, 500 chicks or 250 poults. Made by H. D. Hudson Manufacturing Company.

Ring-shaped clothes pins can be held on your finger, leaving hands free to handle the clothing. They're self adjusting to thickness of cloth without pinching. Made in colors of Lustrex styrene plastic material by Ringlet Clothes Pins.

Scraper fits International Harvester "300" Utility tractor. It's hydraulically controlled, cuts 66 inches, with capacity of five-eighths yard. Recommended for digging trench silos, drainage ditches, terraces, roadways, clearing barnyards, etc. Made by Shawnee Manufacturing Company.

What price next year for even bunches of 200-pound hogs like these? Henry Tageson, Cerro Gordo county, Iowa, may be wondering as he looks over his 34 head.

What's Ahead...

DRY SUBSOIL is the spring prospect for the western Corn Belt. Rainfall in Iowa has been below normal for seven months. Spring pastures will be affected first, if drouth continues. Of course, more-than-average April, May and June rains could save the day as they did in 1954. But you can't be sure they'll come again. If you want to play safe, plan to stock pastures moderately.

Homer Hush

For a look at present soil moisture conditions and possible effects on grain crops, see page 15.

NO BIG CHANGE in the farm income situation is indicated for next year. Business and employment are expected to be good, as they have been. Big consumer demand for food products will continue. That's the bright spot.

BUT ON FARMS, feed of all kinds will be at record high levels. Support prices on corn are slated to go down, possibly 15 cents. The general feed situation will stimulate production of livestock and livestock products.

Farm production will continue at a higher level than even a fully employed people will consume at prices satisfactory to farmers.

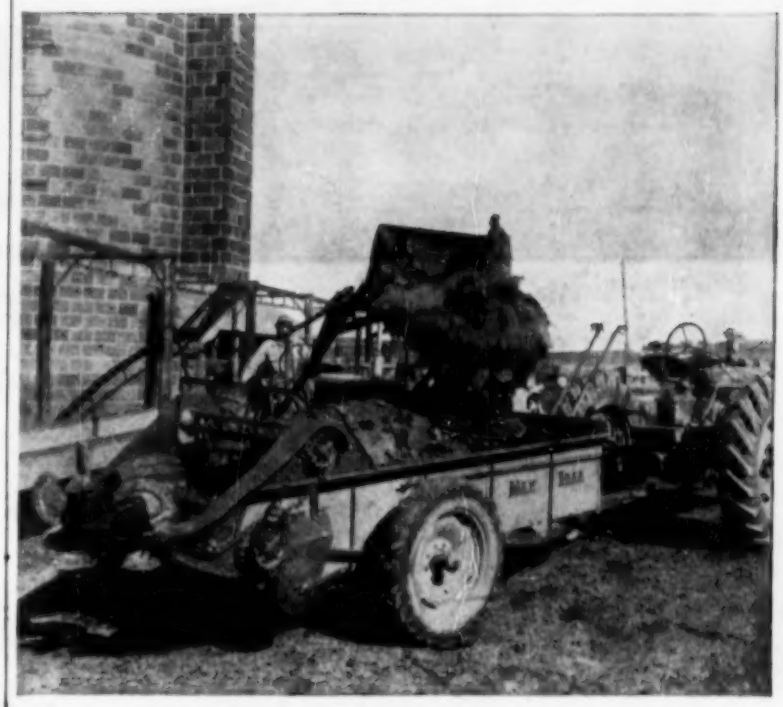
THERE ARE PROPOSALS, however to do something about the situation. A sow buying program is advanced as a method of reducing spring pig production. If pushed vigorously enough to get a 15 or 20 percent reduction in spring pigs, hog prices might be helped in the late part of next year.

The Pig Crop Report on farmers' December 1 intentions to keep sows, will show farmers' plans without government incentives. It will be out in a few days.

In considering effect of any cut, note the big fall pig crop, and big meat supply prospects. One moderate cut in sow numbers cannot be expected to do much for hog prices. History of other cheap-hog periods shows that it takes two moderate cuts or one drastic cut in sow numbers to affect hog prices.

THE CATTLE situation is not unlike the hog situation. We're at a peak in cattle production. Very large numbers were in feedlots on October 1. Big receipts of fat cattle are expected thru the first months of next year. And slaughter of cattle is likely to be heavy all thru the year. Slaughter is always heavy just after cattle numbers start to decline from a peak.

ABOUT THE ONLY chance for better farm income next year is in the adoption of some form of direct or production payments. Supply changes cannot be accomplished soon enough to do the job.



Takes punishment. NEW IDEA's newest spreader with NEW IDEA-Horn hydraulic loader.

15 new features make it spread better, last longer

This new 95-bushel spreader, No. 17, really deserves to join the famous NEW IDEA line.

It's the largest ground driven spreader, and it's guaranteed for a full year. A spreader that will live up to the NEW IDEA reputation—that farmers buy more NEW IDEA spreaders than any other make.

Spreads better 7 ways. The No. 17 still has all the design features that give you "widespread" distribution. But it has these new features, too:

1. Slanted rear arch prevents plugging
2. New capacity—95 bushels
3. Bigger upper cylinder
4. Strong distributor, with tubular shaft
5. Paddles individually replaceable
6. Wide adjustable foot folds out of way
7. Higher shielding saves spillage

This husky new machine is truly designed to spread best.

Lasts longer 8 ways. The NEW IDEA clear yellow pine box, double riveted to a strong steel frame, is famed for long life. Now you have these added assets:

1. New steel flares stand up better
2. Stronger A-hitch extends back into frame for added strength
3. Bigger bearings in distributor
4. New Phenolic fibre bearings
5. New steel end-gate strengthens box
6. Gusset plate frame-to-box reinforcing
7. Box treated with water repellent Penta-preservative
8. Neoprene oil lines stand rough usage

And besides all those new features, the new No. 17 is guaranteed a full year by NEW IDEA.

See the new No. 17 at your NEW IDEA dealer's. Or write for literature. It's one of four NEW IDEA spreaders that do the job best.

Write for free booklet on manure handling.

Best idea yet . . . get a New Idea

NEW IDEA Farm Equipment Co., Division AVCO Distributing Corp.
Dept. 1711, Coldwater, Ohio

Spreads best. New No. 17—95 bu. Also 65, 75 and 120-bushel models.

Season's Greetings from your Conoco Man
